seemingly endless possibilities offered by their many functions can quite literally be sterile and useless objects outside of conscious and tangible human effort Cell phones and the Internet though undoubtedly capable of providing myriad beneficial opportunities for their users need at long last to be put in their place This book is a contribution in that regard Kindled by her own intimate history with her cell phone and a growing curiosity about ICTs in general this book is a culmination of Crystal Powells thoughts reactions to and interpretations of some of the literature on these technologies The book draws on and critically reviews contributions by some leading authors on the social shaping of ICTs and social media to offer a more nuanced and complex understanding of technology in relation to those who use and are used by it HWM ,2008-01
