The Meissner Television Set has been carefully designed for rapid, easy construction, adjustment and operation. It is easy to operate properly; has only six major controls on the front panel. Six minor controls, inside, once set need not be touched again.

All high-voltage leads and components are completely enclosed in a special Safety Compartment which is protected by special interlock safety switches. All current is automatically shut off when the cover is removed.

It is designed to receive the standard R.M.A. signal of 441 lines, and is arranged to tune in both the 44 to 50 and 50 to 56 megacycle channels now in use. Space is also provided in the switch assembly for two additional bands which may be added at any time later. Both Video and Audio frequencies are automatically tuned in together when the receiver is set on a station.

The Meissner Television Receiver is as substantial and rugged as your regular broadcast set. It measures, without the wood cabinet, 10 $\frac{1}{4}$ " wide, 14 $\frac{1}{4}$ " high, 22" deep and weighs approximately 40 pounds. It reproduces pictures 3" x 4" in black and white.

An automatic background control is incorporated which compensates for changes in brightness of the scene being transmitted. Many other features are included.

The complete kit contains all parts necessary for construction and operation, and includes easy-to-follow pictorial and schematic diagrams showing the exact placement of all parts and wires, as well as detailed instructions for assembly, wiring and operation. A complete set of tubes is also provided — there's nothing else to buy. Requires only the use of a volt-ohmmeter, an output meter and a service oscillator — all available at any Radio Service Shop — for complete alignment.
