Introduction

This comprehensive overhaul and repair manual is designed as a service guide for the Mercruiser models previously noted. It provides specific information, including procedures for disassembly, inspection, assembly and adjustment to enable dealers and service mechanics to repair and tune these engines.

Before attempting repairs or tune-up, it is suggested that the procedure first be read through to gain knowledge of the methods and tools used and the cautions and warnings required for safety.

Directional References

Front of boat is bow, rear is stern. Starboard and port sides, port side is left side. In this manufacturer's manual, all directional references are given as they appear when viewing boat from stern, looking forward bow.

Engine Rotation

Engine rotation is determined by observing forward rotation from the rear (stern drive end), of the engine looking forward (bow) pump end. Propeller rotation is not necessarily the same as engine rotation. When ordering replacement engine, shaft bushes or parts for engine, be certain to check engine rotation. Do not rely on propeller rotation in determining engine rotation.
