Wu,2012-12-06 A technological book is written and published for one of two reasons it either renders some other

book in the same field obsolete or breaks new ground in the sense that a gap is filled The present book aims to do the latter On my return from industry to an academic career I started writing this book because I had seen that a gap existed Although a great deal of information appeared in the published literature about various technical aspects of advanced manufacturing technology AMT surprisingly little had been written about the systems context within which the sophisticated hardware and software of AMT are utilized to increase efficiency Therefore I have attempted in this book to show how structured approaches in the design and evaluation of modern manufacturing plant may be adopted with the objective of improving the performance of the factory as a whole I hope this book will be a contribution to the newly recognized multidisciplinary engineering function known as manufacturing systems engineering The text has been designed specifically to demonstrate the systems aspects of modern manufacturing operations including systems concepts of manufacturing operation manufacturing systems modelling and evaluation and the structured design of manufacturing systems One of the major difficulties associated with writing a text of this nature stems from the diversity of the topics involved I have attempted to solve this problem by adopting an overall framework into which the relevant topics are fitted

**Automotive Fuel Containment** ,2000 Encyclopedia of Production and Manufacturing Management Paul M. Swamidass,2006-09-21 The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few This explosive growth makes the need for this volume abundantly clear The manufacturing industry thinks and acts more broadly than it did several decades ago The most notable change has been the need for manufacturing managers to think in technological strategic and competitive terms This is a very favorable development and it leads to manufacturing success The entries in this encyclopedia include the most recent technical and strategic innovations

in production and manufacturing management The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from five to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there are over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects Difficult subjects are made intelligible to the reader without oversimplification The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to understand and implement these ongoing changes in the field
