Analysis III S. M. Nikol'skii, 2013-03-09 In the Part at hand the authors undertake to give a presentation of the historical development of the theory of imbedding of function spaces of the internal as well as the externals motives which have stimulated it and of the current state of art in the field in particular what regards the methods employed today The impossibility to cover all the enormous material connected with these questions inevitably forced on us the necessity to restrict ourselves to a limited circle of ideas which are both fundamental and of principal interest Of course such a choice had to some extent have a subjective character being in the first place dictated by the personal interests of the authors Thus the Part does not constitute a survey of all contemporary questions in the theory of imbedding of function spaces Therefore also the bibliographical references given do not pretend to be exhaustive we only list works mentioned in the text and a more complete bibliography can be found in appropriate other monographs O V Besov v 1 Burenkov P 1 Lizorkin and V G Maz ya have graciously read the Part in manuscript form All their critical remarks for which the authors hereby express their sincere thanks were taken account of in the final editing of the manuscript
