Compressed Air Data William Lawrence Saunders, 1924 *Position, Navigation, and Timing Technologies in the 21st Century* Y. Jade Morton, Frank van Diggelen, James J. Spilker, Jr., Bradford W. Parkinson, Sherman Lo, Grace Gao, 2020-12-17

Covers the latest developments in PNT technologies including integrated satellite navigation sensor systems and civil applications. Featuring sixty-four chapters that are divided into six parts, this two-volume work provides comprehensive coverage of the state of the art in satellite-based position navigation and timing (PNT) technologies and civilian applications. It also examines alternative navigation technologies based on other signals of opportunity and sensors and offers a comprehensive treatment on integrated PNT systems for consumer and commercial applications.

Volume 1 of *Position Navigation and Timing Technologies in the 21st Century Integrated Satellite Navigation Sensor Systems and Civil Applications* contains three parts and focuses on the satellite navigation systems technologies and engineering and scientific applications. It starts with a historical perspective of GPS development and other related PNT development. Current global and regional navigation satellite systems (GNSS and RNSS), their interoperability, signal quality monitoring, satellite orbit and time synchronization, and ground and satellite-based augmentation systems are examined. Recent progresses in satellite navigation receiver technologies and challenges for operations in multipath-rich urban environment in handling spoofing and interference and in ensuring PNT integrity are addressed. A section on satellite navigation for engineering and scientific applications finishes off the volume.

Volume 2 of *Position Navigation and Timing Technologies in the 21st Century Integrated Satellite Navigation Sensor Systems and Civil Applications* consists of three parts and addresses PNT using alternative signals and sensors and integrated PNT technologies for consumer and commercial applications. It looks at PNT using various radio signals of opportunity, atomic clock, optical laser, magnetic field, celestial, MEMS, and inertial sensors, as well as the concept of navigation from Low Earth Orbiting (LEO) satellites. GNSS/INS integration, neuroscience of navigation, and animal navigation are also covered. The volume finishes off with a collection of work on contemporary PNT applications such as survey and mobile mapping, precision agriculture, wearable systems, automated driving, train control, commercial unmanned aircraft systems, aviation and navigation in the unique Arctic environment.

In addition, this text serves as a complete reference and handbook for professionals and students interested in the broad range of PNT subjects. Includes chapters that focus on the latest developments in GNSS and other navigation sensors, techniques, and applications. Illustrates interconnecting relationships between various types of technologies in order to assure more protected, tough, and accurate PNT.

Position Navigation and Timing Technologies in the 21st Century Integrated Satellite Navigation Sensor Systems and Civil Applications will appeal to all industry professionals, researchers, and academics involved with the science, engineering, and applications of position navigation and timing technologies. pnt21book.com
