Neoliberal lives Robert Chernomas, Ian Hudson, Mark Hudson, 2019-07-01 This book is about the transformation of America that has occurred over the past thirty-five years as capitalist logic has expanded into previously protected spheres of life. This expansion has had devastating effects on the potential for human development. Looking at how human beings create themselves and their worlds on material foundations of health and the natural environment through work and politics, the book chronicles how neoliberalism has limited human potential. At a time when neoliberalism's effects are stirring various forms of popular resistance and opposition, this is a manifesto of sorts for the range of processes that need to be confronted if human potential is to be freed from the increasingly cramped quarters to which neoliberalism has confined it.

Heteroglossia and Language Play in Multilingual Speech Darren LaScotte, Elaine Tarone, 2024-01-29 The studies in this volume show how multilingual learners use language play in second language acquisition to internalize sets of voices rather than decontextualized linguistic systems, namely complexes of linguistic and non-linguistic features incorporating the personalities of significant others. In sociocultural terms, these internalized heteroglossic voices become tools that learners can adapt and use playfully to enact chosen roles, stances, and

identities in subsequent oral interactions Different chapters explore these sociocultural constructs using different approaches including variationist sociolinguistics conversation analysis translanguaging and positioning theory
