Grade 1memo Business Studies 2014 Final Exam:

The Emergence of Brand-Name Capitalism in Late Colonial India Douglas E. Haynes, 2022-09-22 This book examines the emergence of professional advertising in western India during the interwar period. It explores the ways in which global manufacturers advanced a brand name capitalism among the Indian middle class by promoting the sale of global commodities during the 1920s and 1930s, a time when advertising was first introduced in India as a profession and underwent critical transformations. Analysing the cultural strategies both verbal and visual used by foreign businesses in their advertisements to capture urban consumers, Haynes argues that the promoters of various commodities crystalized their campaigns around principles of modern conjugality. He also highlights the limitations of brand name capitalism during this period, examining both its inability to cultivate markets in the countryside or among the urban poor and its failure to secure middle class customers. With numerous examples of illustrated advertisements taken from Indian newspapers, the book discusses campaigns for male sex tonics and women's medicines, hot drinks such as Ovaltine and Horlicks, soaps such as Lifebuoy, Lux and Sunlight, cooking mediums such as Dalda, and electrical household technologies. By examining the formation of brand name capitalism and two key structures that accompanied it, the advertising agency and the field of professional advertising, this book sheds new light on the global consumer economy in interwar India and places developments in South Asia into a larger global history of consumer capitalism.

Redefining the Modern Military Nathan K. Finney, Tyrell Mayfield, 2018-10-15 This edited collection will expand upon and refine the ideas on the role of ethics and the profession in the 21st Century. The authors delve into whether Samuel Huntington and Morris Janowitz still ring true in the 21st century, whether training and continuing education play a role in defining a profession, and if there is a universal code of ethics required for the military as a profession. *Redefining the Modern Military* is unique in how it treats the subject of ethics and the military profession as well as the types of writers it brings on board to address this topic. The book puts a significant emphasis on individual agency for military professionalism as opposed to broad organizational or cultural change. Such a review of these topics is necessary because the process of serious intellectual self-reflection is a requirement, especially in a profession that involves life and death of people and nations.
