James, 2021-08-30 This book aims to reconceptualize teaching and learning in spaces with diverse populations of young people Chapters focus on the schooling experiences and social and cultural adaptation issues of individuals who through the meaning that they assign to their lived experiences ascribe to multiple identity qualifiers Contributors explore the impact of this cosmopolitan awareness on students educators and educational institutions presenting issues such as curricular concerns around civic engagement individual subjectivity versus social identity and the convergence of context specific policy and teaching environments on global dynamics in education reform An emphasis on this understanding promises to better equip educators and policy makers to plan instructional approaches and devise pedagogic resources that serve the needs and career aspirations of an expanding cohort of multifaceted learners

The Pedagogy of Standardized Testing Arlo Kempf, 2016-04-29 Based on a large scale international study of teachers in Los Angeles Chicago Ontario and New York this book illustrates the ways increased use of high stakes standardized testing is fundamentally changing education in the US and Canada with a negative overall impact on the way teachers teach and students learn Standardized testing makes understanding students strengths and weaknesses more difficult and class time spent on testing consumes scarce time and attention needed to support the success of all students further disadvantaging ELLs students with exceptionalities low income and racially minoritized students

MultiCultural Review, 2005 **Developing Successful Leadership** Brent Davies, Mark Brundrett, 2010-07-20 Research has shown that school leadership is second only to classroom teaching in its effect on pupil learning As the demands on management teams become ever more complex this volume offers a fresh and expansive view on the challenges to be met in developing a leadership career With contributions from some of the most accomplished commentators on school leadership and management from around the world this book moves away from the simple how to of becoming a principal focusing instead on the wider issues of becoming a successful leader The central aim has been to assemble powerful statements from international authorities that encapsulate leading edge thinking on a group of interconnected themes based on the notion of developing successful leadership in and beyond schools In so doing the text examines strategies for existing leaders developing their full capacity as well as enhancing the skills of those new to or aspiring to a leadership role The chapters contributed by a carefully selected group of leading educationalists present insights on a number of central themes including developing new skill sets in leadership the ethical and moral dimensions of leading an organisation Leadership for instructional and pedagogical success developing leadership capacity and capability through strategic activity Rather than taking a technical approach of how to undertake the managerial or administrative tasks the authors seek instead to develop critical leadership perspectives and skills with chapters on vitally important topics such as strategies for maximizing the potential of the leadership team as a whole They draw not only upon the literature in the field of educational leadership but

also a wider literature in the field of business and management This diversity of perspective ensures this book s appeal to a broad international readership
