Holt Earth Science Textbook Ppt:

Radicalism, Revolution, and Reform in Modern China Catherine Lynch, Robert B. Marks, Paul G. Pickowicz, 2011-03-31

This volume illuminates the relationship of China's radical past to its reformist present as China makes a way forward through very differently conceived and contested visions of the future. In the context of early twenty-first century problems and the failures of global capitalism is China's history of revolutionary socialism an aberration that is soon to be forgotten or can it serve as a resource for creating a more fully human and radically democratic China with implications for all of us? Ranging from the early years of China's revolutionary twentieth century to the present, the essays collected here look at the past and present of China with a view toward better understanding the ideas, ideals, and people who have dared to imagine radical transformation of their worlds and to assess the conceptual, political, and social limitations of these visions and their implementations. The volume's chapters focus on these issues from a range of vantage points representing a spectrum of current scholarship. The first half of the book brings new insights to understanding how early twentieth-century intellectuals interpreted ideas that allowed them to break with China's past and to envision new paths to a modern future. It treats of Chen Duxiu, a founder of the Communist party; Mao Zedong and Mao in relation to the non-Communist Liang Shuming and with the Dalai Lama. With continuing threads of nation and nationalities of peasants, utopias and dystopias linking the chapters, the book's second half looks broadly at the consequences of the implementations of radical ideas at the same time critiquing our accepted frameworks of analysis. Moving up to the present, the book investigates the effects of the reforms since the 1980s on long-term environmental degradation and on the emergence of a capitalist rural economy. It gives an unsparing view into contemporary rural China through independent films. The book concludes with an analysis of the unshakable persistence of the shibboleth, the rise of China in popular culture.

A History of Civilization in 50 Disasters Gale Eaton, 2016-01-04, 2016 IBPA Benjamin Franklin Silver Award Winner. The earth shakes and cracks open. Volcanoes erupt. Continents freeze, bake, and flood. Droughts parch the land. Wildfires and hundred-year storms consume anything in their paths. Invisible clouds of disease and pestilence probe for victims. Tidal waves sweep ashore from the vast sea. The natural world is a dangerous place, but one species has evolved a unique defense against the hazards of civilization: civilization rearranges nature for human convenience. Clothes and houses keep us warm; agriculture feeds us; medicine fights our diseases. It all works most of the time. But key resources lie in the most hazardous places, so we choose to live on river flood plains, on the slopes of volcanoes, at the edge of the sea, above seismic faults. We pack ourselves into cities, Petri dishes for germs. Civilization thrives on the edge of disaster. And what happens when natural forces meet molasses, holding tanks, insecticides, deepwater oil rigs, nuclear power plants? We learn the hard way how to avoid the last disaster and maybe how to create the next one. What we don't know can indeed hurt us. This book's white-knuckled journey from antiquity to the present leads us to wonder at times how humankind has survived. And yet, as Author Gale Eaton makes clear, civilization has advanced not just in spite of disasters but in part because of them.

Hats off to human resilience ingenuity and perseverance They've carried us this far may they continue to do so into our ever hazardous future The History in 50 series explores history by telling thematically linked stories Each book includes 50 illustrated narrative accounts of people and events some well known others often overlooked that together build a rich connect the dots mosaic and challenge conventional assumptions about how history unfolds Dedicated to the premise that history is the greatest story ever told Includes a mix of greatest hits with quirky surprising provocative accounts Challenges readers to think and engage Includes a glossary of technical terms sources by chapter teaching resources as jumping off points for student research and endnotes Fountas Pinnell Level Z
