A person in counseling psychology will typically use personality tests/assessments, interviews, case histories, and observation methods to evaluate a patient's problems, needs, and goals. Counseling psychologists will evaluate data and, from there, create an action plan or treatment plan to counsel the patient with. The goal in this career is to help each patient work toward developing and adjusting social, educational, personal, and vocational skills.

I'm most definitely interested in this career. I've always had an interest in listening to people and their "problems".
