Khalgui, Mohamed,Mosbahi, Olfa,Valentini, Antonio,2013-04-30 Embedded computing systems play an important and complex role in the functionality of electronic devices With our daily routines becoming more reliant on electronics for personal and professional use the understanding of these computing systems is crucial Embedded Computing Systems Applications Optimization and Advanced Design brings together theoretical and technical concepts of intelligent embedded control systems and their use in hardware and software architectures By highlighting formal modeling execution models and optimal implementations this reference source is essential for experts researchers and technical supporters in the industry and academia *Virtual Crowds* Nuria Palechano,Norman Badler,Jan Allbeck,2022-05-31 There are many applications of computer animation and simulation where it is necessary to model virtual crowds of autonomous agents Some of these applications include site planning education entertainment training and human factors analysis for building evacuation Other applications include simulations of scenarios where masses of people gather flow and disperse such as transportation centers sporting events and concerts Most crowd simulations include only basic locomotive behaviors possibly coupled with a few stochastic actions Our goal in this survey is to establish a baseline of techniques and requirements for simulating large scale virtual human populations Sometimes these populations might be mutually engaged in a common activity such as evacuation from a building or area other times they may be going about their individual and personal agenda of work play leisure travel or spectator Computational methods to model one set of requirements may not mesh well with good approaches to another By including both crowd and individual goals and constraints into a comprehensive computational model we expect to simulate the visual texture and contextual behaviors of groups of seemingly sentient beings Table of Contents Introduction Crowd Simulation Methodology Survey Individual Differences in Crowds Framework HiDAC MACES CAROSA HiDAC Local Motion MACES Wayfinding with Communication and Roles CAROSA Functional Crowds Initializing a Scenario Evaluating Crowds Crash Causal Factors and Countermeasures for High-risk Locations on Multilane Primary Highways in Virginia

Nicholas J. Garber,Chase R. Buchanan,2009 In 2004 a total of 95 020 vehicle crashes occurred on highways under the

jurisdiction of the Virginia Department of Transportation VDOT Of these 39 847 crashes occurred on primary highways and 345 of these were fatal crashes VDOT s traffic engineers continue to place increasing emphasis on identifying causal factors for crashes to enhance the selection of appropriate and effective countermeasures The purpose of this study was to identify causal factors and appropriate countermeasures for crashes occurring at high risk locations on multilane primary highways from 2001 through 2006 These high risk locations were identified by Fontaine and Reed 2006 in a VDOT safety corridor study A total of 365 sites 1 to 2 mi in length were used in the study The statewide sites were located on rural and urban highways with divided undivided and traversable medians with about 40 sites per VDOT district Crash data were extracted from police crash reports and geometric data were collected through site visits Operational data were collected using VDOT s resources The analysis involved more than 34 000 crashes and was conducted using fault tree analysis and generalized linear modeling The fault tree analysis was used to determine the critical fault path based on the probability of an event occurring Individual fault trees were constructed for each collision type and for each highway classification The generalized linear models were developed for different highway classifications urban divided urban undivided urban traversable central lanes that can be used for left turns in both directions and rural divided highways Models were developed for rear end crashes and total crashes and separate models were developed for injury crashes property damage only PDO crashes and injury PDO crashes Appropriate potential countermeasures were then identified based on the significant causal factors identified in the models The results indicated that rear end crashes were the predominant type of crash representing 56% of all PDO crashes on urban divided highways and 37% of all PDO crashes on rural divided highways Implementing the recommended countermeasures for total rear end and angle crashes for different assumed levels of rehabilitation is expected to result in a crash reduction of up to about 40% depending on the site and level of rehabilitation undertaken A benefit cost analysis showed that the benefit cost ratios were higher than 1 for all levels of countermeasure implementation **Compact**

Multifunctional Antennas for Wireless Systems Eng Hock Lim,Kwok Wa Leung,2012-05-22 Offers an up to date description of modern multifunctional antenna systems and microwave components Compact multifunctional antennas are of great interest in the field of antennas and wireless communication systems but there are few if any books available that fully explore the multifunctional concept Divided into six chapters Compact Multifunctional Antennas for Wireless Systems encompasses both the active and passive multifunctional antennas and components for microwave systems It provides a systematic valuable reference for antenna microwave researchers and designers Beginning with such novel passive components as antenna filters antenna packaging covers and balun filters the book discusses various miniaturization techniques for the multifunctional antenna systems In addition to amplifying and oscillating antennas the book also covers design considerations for frequency and pattern reconfigurable antennas The last chapter is dedicated to the field of solar cell integrated antennas Inside readers will find comprehensive chapters on Compact Multifunctional Antennas in Microwave

Wireless Systems Multifunctional Passive Integrated Antennas and Components Reconfigurable Antennas Receiving Amplifying Antennas Oscillating Antennas Solar cell integrated Antennas Aimed at professional engineers and researchers designing compact antennas for wireless applications Compact Multifunctional Antennas for Wireless Systems will prove to be an invaluable tool **Embedded and Real Time System Development: A Software Engineering Perspective**

Mohammad Ayoub Khan, Saqib Saeed, Ashraf Darwish, Ajith Abraham, 2013-11-19 Nowadays embedded and real time systems contain complex software The complexity of embedded systems is increasing and the amount and variety of software in the embedded products are growing This creates a big challenge for embedded and real time software development processes and there is a need to develop separate metrics and benchmarks Embedded and Real Time System Development A Software Engineering Perspective Concepts Methods and Principles presents practical as well as conceptual knowledge of the latest tools techniques and methodologies of embedded software engineering and real time systems Each chapter includes an in depth investigation regarding the actual or potential role of software engineering tools in the context of the embedded system and real time system The book presents state of the art and future perspectives with industry experts researchers and academicians sharing ideas and experiences including surrounding frontier technologies breakthroughs innovative solutions and applications The book is organized into four parts Embedded Software Development Process Design Patterns and Development Methodology Modelling Framework and Performance Analysis Power Management and Deployment with altogether 12 chapters The book is aiming at i undergraduate students and postgraduate students conducting research in the areas of embedded software engineering and real time systems ii researchers at universities and other institutions working in these fields and iii practitioners in the R D departments of embedded system It can be used as an advanced reference for a course taught at the postgraduate level in embedded software engineering and real time systems *Mine Ventilation*

Computational Modelling of the Human Islet Amyloid Polypeptide Katrine Kirkeby Skeby, 2016-05-27 This thesis offers readers a comprehensive introduction to amyloid proteins and the computational methods used with them Katrine Skeby critically assesses and compares both the literature and the experiments performed by other researchers which further elevates the quality and relevance of her own work Amyloid proteins are highly complex and this research provides unparalleled insights especially with regard to the origin of cytotoxicity and to developing technologies for early detection revealing in detail the molecular mechanisms behind hIAPP behavior Several studies within the thesis answer difficult questions which promote future research into the properties of amyloid proteins **WALNECK'S CLASSIC CYCLE TRADER, APRIL 2009** Causey Enterprises, LLC, Architectural Digest, 2007 The international magazine of fine interior design **Saving the World at Work** Tim Sanders, 2008-09-16 Even the actions of a single person can help to change the world How Through simple acts of leadership and compassion Open up this book and discover the true stories of people whose actions have caused a chain reaction at work and in their communities Among them A manager who gives an employee some supportive praise and as a result literally saves his life page 231 A small group of bank tellers who spearhead a movement to raise millions of dollars for breast cancer making it the biggest fundraiser in North America and enhancing their company's reputation page 213 A sales manager who gets a copy of a groundbreaking book that leads to a transformation of the company's operations As a result hundreds of millions of pounds of carpet waste avoid the landfill and the company sparks a revolution in its industry page 12 A responsibility revolution is shaking up corporate America In this provocative and insightful book bestselling author Tim Sanders reveals why companies must go beyond making a profit and start making a difference Every one of us regardless of title or position can inspire our companies to change the way they do business helping them to become a positive force for enriching people communities and the environment When this happens not only do we help save the world we help save our companies from becoming irrelevant We also become part of what Sanders calls the Responsibility Revolution Companies that don't participate in this revolution risk becoming obsolete Today customers employees and investors are demanding that companies focus on their social responsibilities not just their bottom lines Sixty five percent of American consumers say they would change to brands associated with a good cause if price and quality were equal 66 percent of recent college graduates will not work for companies with poor social values And more than sixty million people are willing to pay a premium for socially and environmentally responsible products In **SAVING THE WORLD AT WORK** Tim Sanders offers concrete suggestions on how all of us can help our companies join the Responsibility Revolution Drawing on extensive interviews with hundreds of employees and CEOs and illuminated by countless stories of people who are making a difference in the workplace and in the world Sanders offers practical advice every individual and company can use to make the world a better place now and in the future Geospatial Technologies and Homeland Security Daniel Sui, 2008-05-25 Homeland security and context In the Geographical Dimensions of Terrorism GDOT Cutter et al 2003

the first book after 9 11 to address homeland security and geography we developed several thematic research agendas and explored intersections between geographic research and the importance of context both geographical and political in relationship to the concepts of terrorism and security It is good to see that a great deal of new thought and research continues to flow from that initial research agenda as illustrated by many of the papers of this new book entitled Geospatial Technologies and Homeland Security Research Frontiers and Future Challenges Context is relevant not only to understanding homeland security issues broadly but also to the conduct of research on geospatial technologies It is impossible to understand the implications of a homeland security strategy let alone hope to make predictions conduct meaningful modeling and research or assess the value and dangers of geospatial technologies without consideration of overarching political social economic and geographic contexts within which these questions are posed **Popular Science** ,2004-09 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Condé Nast's Traveler** ,2007-10 **The Economist** ,1915
