ICS EDTI 2022 Herve Boileau, Lu Wen Feng, Lauric Garbuio, Hilfi Pardi, 2023-01-16 This book is the proceeding of the International Conference on Sustainable Engineering Development and Technological Innovation ICS EDTI 2022 that was successfully held on 11-13 October 2022 using an hybrid platform. The conference is themed Sustainable empowerment of innovative solutions through the development of integrated scientific researches to enhance the advanced technological world which represents our belief of how the sustainability is essential in our approach to solve problems through technological innovation. A total of 56 papers were submitted and presented within the sessions of the conference. The papers topics revolve around Informatics Technology, Electrical Technology, Marine Technology, Manufacturing System and Technology, Mechanical Engineering, and also Information Industry and Management. In addition to the technical paper presentations, there were also five keynote speeches featured and eight plenary talks were delivered. Two of the keynote speeches were delivered in person by Professor Selo from Universitas Gajah Mada Indonesia and Professor Goib Wiranto from the National Research and Innovation Agency Indonesia. The rest of the keynote speeches were delivered online by Professor Yvon Kermarrec from IMT Atlantique France, Professor Ian Gibson from University of Twente Netherlands, and Dr Ilham Akbar Habibie from The Association of Indonesian Engineer Indonesia. It was a great pleasure to work with the technical program committee led by Mr Hilfi Pardi who have completed the imperative process of peer review on the technical papers submitted in this conference. We are also very fortunate to have on our side the excellent organizing committee team of the Faculty of Engineering of UMRAH who work very hard to organize and support the conference. Finally, our appreciation to all the authors who have participated in this conference with their amazing achievements and enthusiasm. We firmly believe that ICS EDTI is a suitable platform for researchers, engineers, and developers who are concerned with sustainability in engineering and technological development. We hope in the coming years ICS EDTI will be better in terms of the organization of the conference, the quantity and the quality of the researches submitted, and most importantly the impact on the sustainability of technological innovation.

International Scientific Journal Architecture and Engineering Scientific Journal, 2014-10-20 *Journal of Architecture Engineering Vol 2* *Proceedings of the XV International Scientific Conference on Industrial Systems (IS'11)* , **Rock Mechanics and Engineering Volume 2** Xia-Ting Feng, 2017-07-12

Laboratory and Field Testing is the second volume of the five volume set *Rock Mechanics and Engineering* and contains nineteen chapters from key experts in the following fields: Triaxial or True triaxial Tests under Condition of Loading and Unloading, Joint Tests, Dynamic and Creep Tests, Physical Modeling Tests, Field Testing, and URLs. The five volume set *Comprehensive Rock Engineering* which was published in 1993 has had an important influence on the development of rock mechanics and rock engineering. Significant and extensive advances and achievements in these fields over the last 20 years now justify the publishing of a comparable new compilation. *Rock Mechanics and Engineering* represents a highly prestigious

multi volume work edited by Professor Xia Ting Feng with the editorial advice of Professor John A Hudson This new compilation offers an extremely wideranging and comprehensive overview of the state of the art in rock mechanics and rock engineering and is composed of peer reviewed dedicated contributions by all the key experts worldwide Key features of this set are that it provides a systematic global summary of new developments in rock mechanics and rock engineering practices as well as looking ahead to future developments in the fields Contributors are worldrenowned experts in the fields of rock mechanics and rock engineering though younger talented researchers have also been included The individual volumes cover an extremely wide array of topics grouped under five overarching themes Principles Vol 1 Laboratory and Field Testing Vol 2 Analysis Modelling and Design Vol 3 Excavation Support and Monitoring Vol 4 and Surface and Underground Projects Vol 5 This multi volume work sets a new standard for rock mechanics and engineering compendia and will be the go to resource for all engineering professionals and academics involved in rock mechanics and engineering for years to come *Big Data and HPC: Ecosystem and Convergence* L. Grandinetti, S.L. Mirtaheri, R. Shahbazian, 2018-08-22 Due to the increasing need to solve complex problems high performance computing HPC is now one of the most fundamental infrastructures for scientific development in all disciplines and it has progressed massively in recent years as a result HPC facilitates the processing of big data but the tremendous research challenges faced in recent years include the scalability of computing performance for high velocity high variety and high volume big data deep learning with massive scale datasets big data programming paradigms on multi core GPU and hybrid distributed environments and unstructured data processing with high performance computing This book presents 19 selected papers from the TopHPC2017 congress on Advances in High Performance Computing and Big Data Analytics in the Exascale era held in Tehran Iran in April 2017 The book is divided into 3 sections State of the Art and Future Scenarios Big Data Challenges and HPC Challenges and will be of interest to all those whose work involves the processing of Big Data and the use of HPC Material Architecture John Fernandez, 2012-08-21 Composed of a series of essays this book deals with the broad issues affecting the nature of architectural materials and provides a focused review of the state of the art materials It also provides designers with the tools they need to evaluate and select from the thousands of different materials that are available to them The book is organized into three sections Time looks at how the materials used in architectural design have changed over the years showing how we have come to use the materials we do in contemporary design Materials covers all five material families metals polymers ceramics composites and natural materials giving in depth information on their properties behavior origins and uses in design It also introduces a review of the cutting edge research for each family Systems outlines the technical design orientated research that uncovers how new architectural assemblies can be designed and engineered All of this practical advice is given along with many real case examples illustrating how this knowledge and information has been and can be used in architectural design **British Museum** , Project Summaries National Science Foundation (U.S.). Handbook of Research on Digital Research Methods and Architectural Tools in Urban Planning and Design Abusaada, Hisham,Vellguth, Carsten,Elshater, Abeer,2019-06-28 The efficient usage investigation and promotion of new methods tools and technologies within the field of architecture particularly in urban planning and design is becoming more critical as innovation holds the key to cities becoming smarter and ultimately more sustainable In response to this need strategies that can potentially yield more realistic results are continually being sought

The Handbook of Research on Digital Research Methods and Architectural Tools in Urban Planning and Design is a critical reference source that comprehensively covers the concepts and processes of more than 20 new methods in both planning and design in the field of architecture and aims to explain the ways for researchers to apply these methods in their works Pairing innovative approaches alongside traditional research methods the physical dimensions of traditional and new cities are addressed in addition to the non physical aspects and applied models that are currently under development in new settlements such as sustainable cities smart cities creative cities and intercultural cities Featuring a wide range of topics such as built environment urban morphology and city information modeling this book is essential for researchers academicians professionals technology developers architects engineers and policymakers *Multidisciplinary Approach in Research Area (Volume-10)* Chief Editor- Biplab Auddya, Editor- Betsy Manuel, Dr. Manuj Awasthi, Dr. Subhash Jagannath Deshmukh, V Geetha, Pushpanjali S, Dr. Kinjal Bhatia, 2024-05-09 **Dealing with digital information richness in**

supply chain management Kache, Florian, 2015 Information is one of the key enablers of modern business The ever expanding availability of digital information however brings with it the challenge of handling this information appropriately While related challenges now appear in our daily lives this is even more the case along supply chains where a multitude of actors is involved This doctoral thesis addresses the topic by linking theoretical rigor with practical relevance By assessing the current state of research in supply chain management represented in literature reviews a range of under represented areas of research as well as potential future research directions in the field of supply chain management are identified Focusing on one selected exemplary under represented area of research the thesis takes the digital business transformation perspective portraying the value and role of digital information in a business function context As research on the intersection of Big Data Analytics and supply chain management is still scarce the conceptual work offers first insights into an emerging topic both on the internal operations level and on the supply chain level This is beneficial from a scientific as well as a managerial perspective as a thorough understanding of the constituents of a digital ecosystem is a key ingredient for the competitiveness and overall productivity of the company and ultimately of the supply chain as a whole
