Materials for Safeguards and Security William H. Geist,Peter A. Santi,Martyn T. Swinhoe,2024-10-22 This open access book
describes the nondestructive assay techniques that are used for the measurement of nuclear material primarily uranium and
plutonium for nuclear material accountancy purposes It is a substantial revision to the so called PANDA manual that has
been a standard reference since its publication in 1991 The book covers the origin and interactions of gamma rays and
neutrons as they affect nuclear measurements and also describes the theory and practice of calorimetry The book gives a
description of many instruments based on these techniques that are applied in the field Although the basic physics has not
changed since PANDA was first published the last thirty years have seen many advances in analysis methods instrumentation
and applications The basic descriptions of the origin and interactions of radiation have been updated and include newer
references There have been extensive revisions of the description of gamma detection methods attenuation correction
procedures and analysis methods including for the measurement of uranium enrichment and the determination of plutonium
isotopic composition Extensive revisions and additions have also been made to the description of neutron detectors and to
the explanation of neutron coincidence techniques The chapter on neutron multiplicity techniques is a new addition to this
edition The applications of gamma and neutron techniques have been completely overhauled to remove obsolete systems and
to include many current applications The values of and references to nuclear data have been updated This updated edition is
an essential reference for academic researchers and practitioners in the field This is an open access book **Nurse**
