Excerpt from *Manual of Physiology A Text Book for Students of Medicine* The present volume has been written at the desire on the part of the Publishers that a new elementary treatise on Physiology should be added to the series of admirable students manuals which they had previously issued In carrying this desire into execution I have endeavored to avoid theories which have not borne the test of time and such details of methods as are unnecessary for junior students I do not give any history of how our knowledge has grown to its present stand point nor do I mention the names of the authorities upon whose writings my statements depend I have also omitted the mention of exceptional points because I find that exceptions are more easily remembered than the main facts from which they differ and since we must often be content with the retention of the one or the other I have tried to insure that it shall be the more important While endeavoring to save the student from doubtful and erroneous doctrines I have taken great care not to omit any important facts that are necessary to his acquirement of as clear an idea as possible of the principles of Physiology About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
