Mathematics and Transition to School Bob Perry, Amy MacDonald, Ann Gervasoni, 2015-01-09. This edited book brings together for the first time an international collection of work focused on two important aspects of any young child's life: learning mathematics and starting primary or elementary school. The chapters take a variety of perspectives and integrate these two components in sometimes explicit and sometimes more subtle ways. The key issues and themes explored in this book are the mathematical and other strengths that all participants in the transition to school bring to this period of a child's life; the opportunities provided by transition to school for young children's mathematics learning; the importance of partnerships among adults and among adults and children for effective school transitions and mathematics learning; and teaching the critical impact of expectations on their mathematics learning as children start school; the importance of providing children with meaningful, challenging, and relevant mathematical experiences throughout transition to school; the entitlement of children and educators to experience assessment and instructional pedagogies that match the strengths of the learners and the teachers; the importance for the aspirations of children, families, communities, educators, and educational organizations to be recognized as legitimate and key determinants of actions, experiences, and successes in both transition to school and mathematics learning; and the belief that young children are powerful mathematics learners who can demonstrate this power as they start school. In each chapter, authors reflect on their work in the area of mathematics and transition to school, place that work within the overall context of research in these fields, predict the trajectory of this work in the future, and consider the implications of the work both theoretically and practically.

The Boy Crisis Warren Farrell, John Gray, 2018-03-13. What is the boy crisis? It's a crisis of education. Worldwide, boys are 50 percent less likely than girls to meet basic proficiency in reading, math, and science. It's a crisis of mental health. ADHD is on the rise. And as boys become young men, their suicide rates go from equal to girls to six times that of young women. It's a crisis of fathering. Boys are growing up with less involved fathers and are more likely to drop out of school, drink, do drugs, become delinquent, and end up in prison. It's a crisis of purpose. Boys' old sense of purpose—being a warrior, a leader, or a sole breadwinner—is fading. Many bright boys are experiencing a purpose void, feeling alienated, withdrawn, and addicted to immediate gratification. So what is The Boy Crisis? A comprehensive blueprint for what parents, teachers, and policymakers can do to help our sons become happier, healthier men and fathers and leaders worthy of our respect.
