The Nature of Race Ann Morning,2011-06-24 What do Americans think race means What determines one s race appearance ancestry genes or culture How do education government and business influence our views on race To unravel these complex questions Ann Morning takes a close look at how scientists are influencing ideas about race through teaching and textbooks Drawing from in depth interviews with biologists anthropologists and undergraduates Morning explores different conceptions of race finding for example that while many sociologists now assume that race is a social invention or construct anthropologists and biologists are far from such a consensus She discusses powerful new genetic accounts of race and considers how corporations and the government use scientific research for example in designing DNA ancestry tests or census questionnaires in ways that often reinforce the idea that race is biologically determined Widening the debate about race beyond the pages of scholarly journals *The Nature of Race* dissects competing definitions in straightforward language to reveal the logic and assumptions underpinning today s claims about human difference Library of Congress Catalogs
