

MATHEMATICS N2 CLASS EXERCISE 1

QUESTION 1

1.1 Solve the following equations:

1.1.1 $-x^2 + 3x - 2 = 0$ by factorisation (3)

1.1.2 $6(2 - m) - 5(4 - m) = 7$ (3)

1.2 Given: the formula $p = \sqrt[3]{r^2 - q^2}$

1.2.1 Make ' r ' the subject of the formula (3)

1.2.2 Calculate the value of ' r ' if $p = 4$ and $q = 6$ (1)

1.3 Solve for ' x ' and ' y ' in the following simultaneous equations:

$5x = 6y + 3$ and $3y - 4x + 1 = 0$ (4)

Pi: A Source Book J.L. Berggren, Jonathan Borwein, Peter Borwein, 2013-06-29 The aim of this book is to provide a complete history of pi from the dawn of mathematical time to the present The story of pi reflects the most seminal the most serious and sometimes the silliest aspects of

mathematics and a surprising amount of the most important mathematics and mathematicians have contributed to its unfolding Pi is one of the few concepts in mathematics whose mention evokes a response of recognition and interest in those not concerned professionally with the subject Yet despite this no source book on pi has been published One of the beauties of the literature on pi is that it allows for the inclusion of very modern yet still accessible mathematics Mathematicians and historians of mathematics will find this book indispensable Teachers at every level from the seventh grade onward will find here ample resources for anything from special topic courses to individual talks and special student projects The literature on pi included in this source book falls into three classes first a selection of the mathematical literature of four millennia second a variety of historical studies or writings on the cultural meaning and significance of the number and third a number of treatments on pi that are fanciful satirical and or whimsical

Pi: A Source Book Jonathan M. Borwein, 2013-06-29 Our intention in this collection is to provide largely through original writings an extended account of pi from the dawn of mathematical time to the present The story of pi reflects the most seminal the most serious and sometimes the most whimsical aspects of mathematics A surprising amount of the most important mathematics and a significant number of the most important mathematicians have contributed to its unfolding directly or otherwise Pi is one of the few mathematical concepts whose mention evokes a response of recognition and interest in those not concerned professionally with the subject It has been a part of human culture and the educated imagination for more than twenty five hundred years The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research To pursue this topic as it developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry analysis and special functions numerical analysis algebra and number theory It offers a subject that provides mathematicians with examples of many current mathematical techniques as well as a palpable sense of their historical development Why a Source Book Few books serve wider potential audiences than does a source book To our knowledge there is at present no easy access to the bulk of the material we have collected

Examcart NDA/NA Maths & GAT Question Bank for 2025 Exam in Hindi Examcart Experts, Teaching Adult Numeracy: Principles & Practice Griffiths, Graham, Stone, Rachel, 2013-09-01 This book offers friendly guidance on how to work with adult learners to develop their numeracy and mathematics skills It brings together current research and practice on teaching adult numeracy into one handy volume and covers the major issues faced by teachers of adult numeracy such as current policy perspectives and implications for teaching practice There are reflective tasks throughout which encourage you to develop and apply your theoretical knowledge to your own experiences Key features include Reviews of existing policy and research and implications for practice Reflective tasks with commentary encouraging you to develop and apply your knowledge Case studies of real student experiences Practical activities and ideas to support the planning teaching and assessment of adult numeracy Drawing on the substantial experience of the contributors who have a wealth of experience as practitioners and researchers

in the field this book is an essential resource for trainee and practising teachers of adult numeracy and mathematics It is also an ideal textbook to support teacher training courses leading to a subject specific qualification in teaching numeracy to adults Contributors Jackie Ashton John Barton Carolyn Brooks Martyn Edwards Janette Gibney David Holloway David Kaye Beth Kelly Barbara Newmarch Helen Oughton David Prinn Diana Spurr Rebecca Woolley This is a quite unique book about teaching adult numeracy which will be invaluable to the many practitioners in this field The chapters contributed by a group of experienced and successful lecturers and practitioners include all aspects of this field from methods of teaching specific mathematical topics to more general explorations of dyscalculia and emotional factors in adult learners Each chapter includes research findings and thoughtful presentation of ideas with practical ideas for teaching and tasks for the reader This is a market which has not been served well in the past so it is good to see the gap filled at last Margaret Brown Emeritus Professor of Mathematics Education King s College London UK The editors of this book set out to produce a text that would support teacher education programmes for adult numeracy and their book does that and more The content covers different types of learners different settings different understandings of what numeracy actually is and ranges from commentary on research through case studies to how to hints and tips for teaching Chapters 7 on provoking mathematical thinking and 8 attitudes beliefs and teaching should be a required read for any adult numeracy teacher The book would be at home on any numeracy teacher s desk and would make an excellent set text for numeracy teacher training courses Carol Randall course co ordinator for numeracy in the department of Lifelong Learning Teacher Education University of Greenwich UK This book is a welcome addition to the growing literature on adult numeracy It should be essential reading for trainee and practising adult numeracy educators It brings together relevant research and professional wisdom on a wide variety of aspects of adult numeracy teaching and learning in an accessible way with well focussed tasks for readers to extend their knowledge and understanding While the book is born out of UK concerns and issues it is also relevant to international readers Highly recommended Professor Diana Coben PhD Director National Centre of Literacy Numeracy for Adults University of Waikato New Zealand and Hon Trustee Adults Learning Mathematics A Research Forum ALM www.alm.online.net

Statewide Exit Exams, Governance, and School Development Esther Dominique Klein, 2013 In the context of outcomes based school governance statewide exit exams are often expected to have a positive effect on student achievements if schools and teachers use the performance feedback from the exams for school instructional and professional development However very little is known about whether the exams are used for development at all and how this is affected by factors in the exam system and organizational aspects of schools In a comparison of Finland Ireland and the Netherlands the study therefore investigates how different exam systems and their functions the conditions at school level and the use of the exams for school and classroom development are associated The study uses expert interviews and a questionnaire survey with principals and teachers The role statewide exit exams can play in education systems is analyzed from a governance perspective and a school

development perspective and discussed with an international comparative view Esther Dominique Klein born in 1982 Dr phil is research assistant at the Faculty of Educational Sciences of the University of Duisburg Essen Her main research interests lie in the areas of school system and school development research and international comparative education
