Yan A. Wang, Mark Thachuk, Roman Krems, Jean Maruani, 2018-05-17 This edited multi author volume contains selected peer reviewed contributions based on the presentations given at the 21th International Workshop on Quantum Systems in Chemistry Physics and Biology QSCP XXI held in Vancouver Canada in July 2016 This book is primarily aimed at scholars researchers and graduate students working at universities and scientific laboratories and interested in the structure properties dynamics and spectroscopy of atoms molecules biological systems and condensed matter Combinatorics '86 M. Marchi, A. Barlotti, G. Tallini, 2011-09-22 Recent developments in all aspects of combinatorial and incidence geometry are covered in this volume including their links with the foundations of geometry graph theory and algebraic structures and the applications to coding theory and computer science Topics covered include Galois geometries blocking sets affine and projective planes incidence structures and their automorphism groups Matroids graph theory and designs are also treated along with weak algebraic structures such as near rings near fields quasi groups loops hypergroups etc and permutation sets and groups The vitality of combinatorics today lies in its important interactions with computer science The problems which arise are of a varied nature and suitable techniques to deal with them have to be devised for each situation one of the special features of combinatorics is the often sporadic nature of solutions stemming from its links with number theory The branches of combinatorics are many and various and all of them are represented in the 56 papers in this volume Sustainability Heather M. Farley, Zachary A. Smith, 2020-03-31 In this second edition the authors present new developments in the sustainability discussion and argue that a new understanding of sustainability is needed if we are to truly serve future generations ecologically economically and equitably Despite the great flurry of activity around sustainability the concept itself remains highly contested This book argues that a new conceptualization of sustainability is needed if we are to achieve a healthful and sustainable environment for the long term The authors examine the uses misuses and abuses of sustainability and provide case studies of faux sustainability in practice Seeking to redefine and clarify the concept and its application they offer a new definition of sustainability what they call neo sustainability to help guide policies and practices that respect the primacy of the environment the natural limits of the environment and the relationship between environmental social and economic systems Offering a comprehensive view of sustainability this text is essential reading for all students and scholars in the field It will also be of interest to environmental professionals and activists Geospatial Technologies and Geography Education in a Changing World Osvaldo Muñiz Solari, Ali Demirci, Joop van der Schee, 2015-08-31 This book is an initiative presented by the Commission on Geographical Education of the International Geographical Union It focuses particularly on what has been learned from geospatial projects and research from the past decades of implementing geospatial technologies GST in formal and informal education The objective of this publication is to inform an international audience of teachers professionals scholars and policymakers about the state of the art and prospects of geospatial practices GPs as organized activities that use GST and lessons learned in relation to geographical education GST make up an advanced body of

knowledge developed by practitioners of geographic information systems GIS remote sensing RS global positioning systems GPS and digital cartography DC GST have long been applied in many different sectors however their first use in higher education began in the early 1980s and then diffused to secondary schools during the 1990s Starting with GIS and RS it evolved into a much broader context as GST expanded to include GPS and DC with new communication technologies and Internet applications GST have been used around the world as a combination of tools and special techniques to make research teaching and learning more effective
