Indicated stereotypical aspects of the novel can be a basis for critical questions and reflections on language related gender stereotypes in literature advertisement and media Furthermore the preparation of the examination results in an analytical framework for literary texts This paper starts off by first of all explaining the sociolinguistic perspective on linguistic gender differences to provide a clear comprehension of stereotypes their significance the deficits of early research on this variation and the complexity of this subject Subsequently the corpora s composition is illustrated and significant results of the application of the framework of analysis to the representations of direct speech of both characters are displayed The next chapter then includes an in depth examination of a specific part of the novel to obtain more comprehensive information regarding the contribution of representations of linguistic clichés to literary functions and a comparison of the findings Finally explanations for the analysis results are considered in the final chapter to justify their reliability and increase the understanding of the influences of linguistic assumptions on this novel
