 The information technology revolution that started in the mid twentieth century with the introduction of the transistor and
 then the integrated circuit has gradually transformed into the Internet revolution then the blockchain revolution and now is
 transforming again into the artificial intelligence AI revolution Why is now such a pivotal time with so much optimism for a
 better future The answer is complex and multifaceted Perhaps most importantly the introduction of low cost AI enabled
 technological advances creates an ideal environment for the rapid attainment of global equity across multiple sectors of
 society and economy Healthcare in general and medicine in particular stand to benefit tremendously from this new
 previously unavailable capacity a result of the synergistic effects of modern cutting edge technologies working together For
 example greater access to decentralized locally based AI aided facilitated medical education may help fulfill the dreams of
 individuals who previously were not able to become physicians In another example increasing the use of point of care AI ML
 in the clinical setting promises to bring true precision medicine to populations that previously did not have adequate access
 to healthcare in general The level of positive disruption possible with optimized ethical and thoughtful implementation of AI
 in healthcare may produce constructive ripple effects not dissimilar to the introduction of cellular telephony into areas of the
 world without prior telephone access This book discusses both current trends and future developments in AI ML across
 healthcare with a focus on the transformational impact of this emerging technological domain on enhancing the access
