Improvement Science: Promoting Equity in Schools is intended for classroom teachers, school leaders, and district leaders charged with leading improvement efforts in schools. From questions such as "how do I develop a love of reading in my classroom?" to "how can I better manage student behavior during independent learning time?" to "what should we do to make sure kids of all races read at grade level by 3rd grade?" to "how could we include families of all backgrounds as partners in learning?" or "how do we increase our graduation rate among underserved students?" this book shares real-life examples from those who are currently leading equity-focused improvement in our classrooms and schools. If you are curious about how *Improvement Science* has been used or how others have succeeded or failed at equity-focused improvement efforts in our classrooms and in our schools or if you're wondering how to spur discussions in school districts, universities, and communities about leading equity-focused improvement, this book is for you. After you've done the above, then it's time to test one idea using short Plan-Do-Study-Act cycles. These are short improvement cycles. Students are only in our classrooms generally for one year, so the cycles need to be short, perhaps even as short as one week, to ensure that every instructional move we are making truly does improve the experience of the students. Readers of *Improvement Science: Promoting Equity in Schools* will be taking an important step toward achieving the goal of producing socially just classrooms and schools.
