Validity of Educational Assessments in Chile and Latin America Jorge Manzi, María Rosa García, Sandy Taut, 2021-09-11 This edited volume presents a systematic analysis of conceptual methodological and applied aspects related to the validation of educational tests used in Latin American countries Inspired by international standards on educational measurement and evaluation this book illustrates efforts that have been made in several countries to validate different types of educational assessments including student learning assessments measurements of non cognitive aspects in students teacher evaluations and tests for certification and selection It gathers the experience of validity studies from the main international assessments in Latin America PISA TIMSS ERCE and ICCS Additionally it shows the challenges that must be taken into account when evaluations are used to compare countries groups or trends of achievement over time The book builds on the premise that

measurements in the educational field should not be used if there are no studies that support the validity of the interpretation of their scores or the use made of such tests. It shows that despite the recognition given to validity, relatively few educational measurement assessments have accumulated enough evidence to support their interpretation and use. In doing so, this volume increases awareness about the relevance of validity, especially when assessments are a key component of educational policies.

Aesthetics, Affect, and Making Meaning in Science Education Per-Olof Wickman, Vaughan Prain, Russell Tytler, 2025-02-12. This book offers novel approaches, theoretical insights, and results on the development of students and teachers' interest in science as situated learning. It argues for the importance of the affective and emotional dimensions of teaching and learning in STEM classrooms in parallel to the cognitive dimensions. Contributions to this book examine aesthetics, aesthetic judgement, and aesthetic experience in science education from the perspectives of researchers and practitioners and make a case for integrating aesthetics and affective experiences in science education teaching and learning research and practice. They explore how an aesthetics of science can empirically be observed to take shape through classroom interactions and how such interactions influence learning and how science is valued in aesthetic terms in relation to other practices. The research studies featured in this book span from preschool to undergraduate students and also include a theoretical contribution reviewing and synthesising the methodological contributions to this volume. They draw on recent theoretical, methodological, and empirical advances on the role of aesthetic experience for learning science. These new developments are used to investigate how a disciplinary aesthetics of science can be developed and can meet that of other subjects and how these various aesthetic practices may be generatively dovetailed for the benefit of learning science and developing an interest in science. This book's contribution extends beyond the fields of science education research. Its insights can assist policymakers, instructional designers, and teacher educators in considering emotional aspects of learning and values more generally when implementing strategies to foster meaning-making alongside sense-making. It was originally published as a special issue of the *International Journal of Science Education*.

Progressing Students' Language Day by Day Alison L. Bailey, Margaret Heritage, 2018-07-26. Because content and language learning go hand in hand, new content standards integrate content and language in ways prior standards have never done. That's why it's so critically important that teachers attend to both content and language development when introducing new subject matter, especially for English learners. Here's your opportunity to get started tomorrow and every day thereafter. Alison Bailey and Margaret Heritage's all new *Progressing Students' Language Day by Day*. What's so utterly ground-breaking about this book is Bailey and Heritage's Dynamic Language Learning Progression (DLLP) process, research-based tools for obtaining much deeper insight into a student's language progress, then for identifying the most appropriate instructional steps to elevate language proficiency and content knowledge. Step by step, Bailey and Heritage describe how to engage with students to advance their development of sophisticated, high-leverage language features for explaining content. Use the DLLP approach to formative assessment, then

plan your teaching in response to assessment evidence Examine words sentences and discourse the three dimensions of language that are part of the DLLP process for cultivating language development Discover how leadership support and communities of practice CoPs can facilitate a successful and sustainable implementation of the DLLP process Listen more closely and uncover new ways to advance content learning with Progressing Students Language Day by Day directly by your side Alison Bailey and Margaret Heritage open our eyes to the often invisible and context specific language demands embedded in content learning Understanding the ubiquitous and highly influential role of language in learning takes time and effort but leads to transformative practice Progressing Students Language Learning Day by Day offers an insightful and concrete framework to begin this transformation Paola Uccelli Professor of Education Harvard University
