pressure and support from the federal government states have increasingly turned to indicators based on student test scores
to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject
areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades
4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district
Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume
seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and
subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end
of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case
issues related to design and development psychometric considerations and validity challenges are covered from both a
generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series
