Making Education Work for the Poor William Elliott, Melinda Lewis, 2018-07-03 Making Education Work for the Poor identifies wealth inequality as the gravest threat to the endangered American Dream Though studies have clearly illustrated that education is the primary path to upward mobility today educational outcomes are more directly determined by wealth than innate ability and exerted effort This accounting directly contradicts Americans understanding of the promise the American Dream is supposed to offer a level playing field and a path towards a more profitable future In this book the authors share their own stories of their journeys through the unequal U S education system One started from relative privilege and had her way to prosperity paved and her individual efforts augmented by institutional and structural support The other grew up in poverty and had to fight against currents to complete higher education only to find his ability to profit from that degree compromised by student debt To directly counter wealth inequality and make education the great equalizer that Americans believe it to be this book calls for a revolution in financial aid policy from debt dependence to asset empowerment The book examines the evidence base supporting Children s Savings Accounts including CSAs demonstrated potential to improve children s outcomes all along the opportunity pipeline early education school achievement college access and completion and post college financial health It then outlines a policy that builds on CSAs to incorporate a sizable progressive wealth transfer This new policy Opportunity Investment Accounts is framed as the cornerstone of the wealth building agenda the nation needs in order to salvage the American Dream Written by leading CSA researchers the book

includes overviews of the major children's savings legislation proposed in Congress and the key features of prominent CSA programs in operation around the country today as well as new qualitative and quantitative CSA research. The book ultimately presents a critical development of the theories that together explain how universal progressive asset-based education financing could make education work equitably for all American children. Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10. The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe. Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development. In addition, a discussion of possible scenarios which systematically addresses the implications of anti-crisis policies is missing. This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy. It argues that combining critical political economy approaches and post-Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis. Although both approaches have the capacity to deal with asymmetries and uneven development, the heterogeneity in Europe has been an often largely neglected dimension of analysis. However, this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration. Hence, this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives. This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE, European political economy, and European politics. The Routledge Companion to Bourdieu's 'Distinction' Philippe Coulangeon, Julien Duval, 2014-10-30. This edited collection explores the genesis of Bourdieu's classical book *Distinction* and its international career in contemporary Social Sciences. It includes contributions from contemporary sociologists from diverse countries who question the theoretical legacy of this book in various fields and national contexts. Invited authors review and exemplify current controversies concerning the theses promoted in *Distinction* in the sociology of culture, lifestyles, social classes, and stratification, with a specific attention dedicated to the emerging forms of cultural capital and the logics of distinction that occur in relation to material consumption or bodily practices. They also empirically illustrate the theoretical contribution of *Distinction* in relation with such notions as field or habitus, which fruitfulness is emphasized in relation with some methodological innovations of the book. In this respect, a special focus is put on the emerging stream of distinction studies and on the opportunities offered by the geometrical data analysis of social spaces. *Economic Geography* Neil M. The Rise and Rise of Illegal Ticket Touting Alessandro Moretti, 2023-02-10 This book presents an ethnographic study of contemporary ticket touts in the UK Despite the recent interest in the topic of black market ticket sales media coverage and parliamentary interventions over the last ten years have revealed a widespread lack of knowledge with regard to the phenomenon of touting and the players engaging in the practice *The Rise and Rise of Illegal Ticket Touting* sheds light on the world of touting and delivers an authentic picture of the individuals involved of their methods values and motivations for performing ticket touting as an organised entrepreneurial deviant activity The touts varied methods of buying and selling tickets the hierarchical structures and strict ethos of their criminal organisations and
