Duchesne, Dr Anne McMaugh, 2018-10-01 Educational Psychology for Learning and Teaching introduces key theories of development and learning to help you understand how learners learn and how educators can be more effective in their teaching practice. Featuring current research on the various dimensions of learning and teaching alongside traditional theories, it provides a clear framework of theory and evidence that supports modern education practices. Taking a comprehensive approach, this text investigates how to apply psychology principles to education contexts to enhance learning and teaching quality, particularly for accommodating individual student needs. This wholly Australian and New Zealand text caters for those who are planning to work with any age range from early childhood to adolescence and beyond. With a greater focus on resilience in education settings, the discussion of creativity alongside intelligence and a broader discussion on diversity, this new edition is up to date for the pre-service teacher. New print versions of this book come with bonus online study tools on the CourseMate Express and Search Me platforms. Premium online teaching and learning tools are available to purchase on the MindTap platform. Science Teaching Reconsidered National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Undergraduate Science Education, 1997-04-12 Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. Science Teaching Reconsidered provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods and the wonder of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research. **The Reality of Change**, 2000 Annual Report of the Ontario Agricultural College and Experimental Farm, for the Year Ending 31st December ...
