

Tipping Culture: ***Math in Real Life***

Here's a ready-to-go real-world math lesson for middle grades students (grades 6-9) or high school special education classes.

How to Use:

1. The first part of the lesson is a handout with blanks that you can complete with your whole class. Teach students about tipping: what it is, where it is done, what kinds of services expect tipping, and why tipping has been increasing recently.
2. Next, use page two to teach students two methods of calculating a tip (using known **percentage benchmarks** and **multiplying by a percentage written as a decimal**). Students can also try to determine a third method to use.
3. Then, there are seven practice problems of real-life tipping situations for students to complete. From paying at a salon, to tipping for a meal, and even calculating tax AND tip, students will get lots of realistic practice as they complete these problems independently or in small groups.
4. Finally, I would recommend having a class discussion either before or after you have your students complete the written reflection about tipping culture.
