Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group received a standard diet and water, while the experimental group received a diet supplemented with 0.5% of the active ingredient. The subjects were then subjected to a 10-week period of physical training. The results of the study are presented in the form of a bar chart, showing the mean values and standard deviation for each group.
