### Section 1: What is Chemistry?

#### Objectives:

- Describe ways in which chemistry is a part of your daily life.
- Describe the characteristics of three common states of matter.
- Describe physical and chemical changes, and give examples of each.
- Identify the reactants and products in a chemical reaction.
- List four observations that suggest a chemical change has occurred.

A \_\_\_\_\_ is any substance that has a definite composition. A \_\_\_\_\_ is the process by which one or more substances change to produce one or more new substances. The \_\_\_\_\_ of \_\_\_\_\_ are the physical forms of matter which are solid, liquid, gas, and plasma.

- \_\_\_\_\_ have a fixed volume and shape that result from the way their particles are arranged.
- \_\_\_\_\_ have a fixed volume but not a fixed shape.
- \_\_\_\_\_ have neither fixed volume nor shape.

Physical changes are changes in which the \_\_\_\_\_ of a substance doesn't change.

- Changes of state are physical changes.

Chemical changes occur when the \_\_\_\_\_ of substances change and new substances form.

#### Evidence of a chemical change:

The four photographs show evidence of chemical changes:

- a. White powder mixed in vinegar, small bubbles hydrochloric acid form; the bubbles are carbon dioxide form.
- b. White solution and sodium sulfide and calcium nitrate are mixed; calcium sulfide is formed (precipitate, brown).
- c. White aluminum reacts with concentrated HCl; energy is released; the heat melts the snow and lights.

Wainer,2011-08-08 What statistical evidence shows us about our misguided educational policies Uneducated Guesses challenges everything our policymakers thought they knew about education and education reform from how to close the achievement gap in public schools to admission standards for top universities In this explosive book Howard Wainer uses statistical evidence to show why some of the most widely held beliefs in education today and the policies that have resulted are wrong He shows why colleges that make the SAT optional for applicants end up with underperforming students and inflated national rankings and why the push to substitute achievement tests for aptitude tests makes no sense Wainer challenges the thinking behind the enormous rise of advanced placement courses in high schools and demonstrates why assessing teachers based on how well their students perform on tests a central pillar of recent education reforms is woefully misguided He explains why college rankings are often lacking in hard evidence why essay questions on tests disadvantage women why the most grievous errors in education testing are not made by testing organizations and much more No one concerned about seeing our children achieve their full potential can afford to ignore this book With forceful storytelling wry insight and a wealth of real world examples Uneducated Guesses exposes today s educational policies to the light of empirical evidence and offers solutions for fairer and more viable future policies      **Children's Books in Print, 2007** ,2006
