This much anticipated modernization of Light s Manual is an astonishing accomplishment blending state of the art taxonomy with profusely illustrated and user friendly keys to who s whom on marine shores from its stated boundaries of mid California through Oregon and clearly much further north It s also an informative well referenced read Marine biologists should not leave home without it Robert Paine Professor Emeritus of Biology University of Washington At this time of environmental change and loss of biodiversity species identification has never been more important The fourth edition of Light and Smith is more than just a field guide it is a masterwork of research and description with a strong focus on morphological detail No other book has such a broad scope newly expanded to include even the most obscure taxa The revised keys and beautiful anatomical illustrations make this classic guide more indispensable than ever As taxonomists become extinct there are fewer students to receive the vast body of knowledge accumulated by generations of careful study I hope that the beauty and depth of this guide will inspire a generation of young scientists to continue this critical taxonomic work It will have a place of honor in all marine labs Paul K Dayton Scripps Institution of Oceanography **The Complete Small Truck Cost Guide 1997**
