Georgine Clarsen, 2008-10-01 The history of the automobile would be incomplete without considering the influence of the car on the lives and careers of women in the earliest decades of the twentieth century Illuminating the relationship between women and cars with case studies from across the globe *Eat My Dust* challenges the received wisdom that men embraced automobile technology more naturally than did women Georgine Clarsen highlights the personal stories of women from the United States Britain Australia and colonial Africa from the early days of motoring until 1930 She notes the different ways in which these women embraced automobile technology in their national and cultural context As mechanics and taxi drivers like Australian Alice Anderson and Brit Sheila O Neil and long distance adventurers and political activists like South Africans Margaret Belcher and Ellen Budgell and American suffragist Sara Bard Field women sought to define the technology in their own terms and according to their own needs They challenged traditional notions of femininity through their love of cars and proved they were articulate confident and mechanically savvy motorists in their own right More than new chapters in automobile history these stories locate women motorists within twentieth century debates about class gender sexuality race and nation

The Fragile Bridge Steve Golin, 1988 In this full length study of the 1913 Paterson silk strike Steve Golin examines the creative collaboration between the silk workers organizers from the Industrial Workers of the World and Greenwich Village intellectuals Although the strike was defeated this alliance could become a model for the American left because it suggests the possibilities of connecting economic political and cultural struggles Combining perspectives from labor history social history and intellectual history Golin argues that while the silk workers began the 1913 strike and controlled it themselves the IWW helped them create institutions that supported the strike and reinforced its radically democratic character The deadlock in Paterson dictated the need for a bridge to New York that was facilitated by a growing mutual trust between the Wobblies and intellectuals from Greenwich Village At the height of the struggle the IWW and the Village radicals joined the workers in presenting a powerful strike pageant in Madison Square Garden The story of the 1913 silk strike is important because it challenges long held conservative assumptions about labor history including the elitist role of skilled workers the bureaucratic function of union organization and the irrelevance of intellectuals Although the strikers were ultimately defeated the strike's failure had more damaging consequences for the IWW and the intellectuals than for the workers themselves and Golin views this loss as a major turning point for the American left Author note Steve Golin is Professor of History at Bloomfield College in New Jersey
