Strategic Communication for Non-Profit Organisations Evandro Oliveira, Ana Duarte Melo, Gisela Goncalves, 2019-03-28
Communication in the public sphere as well as within organizational contexts has attracted the interest of researchers over the past century Current forms of citizen engagement and community development partly enabled through digital communication have further enhanced the visibility and relevance of non profit communication These are performed by the civil society which is the organized expression of the values and interests of society Castells 2008 in the public sphere Non profit communication feeds the public sphere as the discursive processes in a complex network of persons institutionalized associations and organizations whereas those discourses are a civilized way of disagreeing openly about essential matters of common concern Jensen 2002 Despite the relevance in the public sphere non profit communication was never properly

defined within communication research The aim of the present book is to offer an overview and report on Strategic Communication for Non Profit Organisations and the Challenges and Alternative Approaches Considering the assumption that a key principle of strategic communication is the achievement of organisational goals the majority of research developed in the field has used business environments to develop theories models empirical insights and case studies Here we take a step towards new approaches centred on the concept of non profit in various dimensions and from various perspectives showing the diversity and complexity around this subject and at the same time the need of further theoretical and empirical work that provides frameworks and also tools for further understanding of the phenomena
