The current trends of Industrie 4.0 digital manufacturing and the rise of smart products allow for a fresh perspective on MCP Customization 4.0. The book places a new set of values in the centre of the debate: a world with finite resources, global population growth and exacerbating climate change needs smart thinking to engage the most effective capabilities and resources. It discusses how Customization 4.0 fosters sustainable development and creates shared value for companies, customers, consumers and the society as a whole. The chapters of this book are contributed by a wide range of specialists offering cutting edge research as well as insightful advances in industrial practice in key areas. The MCPC 2017 has a strong focus on real life MCP applications and this proceedings volume reflects this. MCP strategies aim to profit from the fact that people are different. Their objective is to turn customer heterogeneities into opportunities, hence addressing long tail business models. The objective of MCP is to provide goods and services that best serve individual customers' needs with near mass production efficiency. This proceedings volume highlights the interdisciplinary work of thought leaders, technology developers and researchers with corporate entrepreneurs putting these strategies into practice. The existing literature provides very little information on the real and current process of waste disposal and recycling in China. China generates large amount of waste and it covers about 20 % of the world waste trade. This book focuses on China's waste management and recycling policy. The book also examines the relationship between China's waste management and recycling industry and its legal structure. It fills in the gap by providing insight into topics on how to resolve China's waste management and recycling problems, theories and empirical studies on waste and management as well as waste management policies in East Asia. It also includes comparative analysis through case studies on other Asian countries such as Thailand and Japan.
