A

She felt out of place (that she didn't belong) and was scared of losing her identity.

NOTICE!

Hi, I'm Aina! I grew up in remote northern Canada, as a member of an indigenous community. My people are Inuit, and up to the age of 18 I spent my days in a very traditional way: fishing and cooking, as well as attending a local school. And then my life changed completely when I met Jordan. Jordan had arrived in my area as an anthropologist a year before I met him, and he was studying our language and traditions. We fell in love and eventually we got married and moved to Montreal. I did try to fit in, but I really suffered from culture shock and felt out of place. I was scared of losing my identity and didn't know who I was anymore. After a long struggle I finally realized that my family background and community had made me who I was, but that my choices have made me who I am today.

The past tenses in the text are simple past, past progressive, and past perfect.

The auxiliary verb *did* is sometimes used for emphasis.

Psychology and Mathematics Education Gila Hanna, Laura Macchi, Karin Binder, Laura Martignon, Katharina Loibl, 2023-09-05 Modern Mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems Thus it is par excellence a model of rational inquiry Links between Cognitive Psychology and Mathematics Education have been particularly strong during the last decades Indeed the Enlightenment view of the rational human mind that reasons makes decisions and solves problems based on logic and probabilities was shaken during the second half of the twentieth century Cognitive psychologists discovered that humans thoughts and actions often deviate from rules imposed by strict normative theories of inference Yet these deviations should not be called errors as Cognitive Psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved or biases that are caused by a lack of adaptation to abstract

information formats Humans as the cognitive psychologist and economist Herbert Simon claimed do not usually optimize but rather satisfice even when solving problem This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program In Simon s bounded rationality and its direct descendant ecological rationality rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content free norms of coherence e g transitivity Mastermind Level 1 ,2011
