Maths Paper 1 Memo 2014 November:

A Homology Theory for Smale Spaces Ian F. Putnam, 2014-09-29 The author develops a homology theory for Smale spaces which include the basic sets for an Axiom A diffeomorphism. It is based on two ingredients. The first is an improved version of Bowen's result that every such system is the image of a shift of finite type under a finite-to-one factor map. The second is Krieger's dimension group invariant for shifts of finite type. He proves a Lefschetz formula which relates the number of periodic points of the system for a given period to trace data from the action of the dynamics on the homology groups. The existence of such a theory was proposed by Bowen in the 1970s. *Studies in Intelligence*, 2016

Critical Population and Error Threshold on the Sharp Peak Landscape for a Moran Model Raphaël Cerf, 2014-12-20 The goal of this work is to propose a finite population counterpart to Eigen's model which incorporates stochastic effects. The author considers a Moran model describing the evolution of a population of size of chromosomes of length n over an alphabet of cardinality k . The mutation probability per locus is μ . He deals only with the sharp peak landscape: the replication rate is 1 for the master sequence and 0 for the other sequences. He studies the equilibrium distribution of the process in the regime where $n\mu \rightarrow 0$.

Fundamental Solutions and Local Solvability for Nonsmooth Hormander's Operators Marco Bramanti, Luca Brandolini, Maria Manfredini, Marco Pedroni, 2017-09-25 The authors consider operators of the form $\Delta + b \cdot \nabla$ in a bounded domain Ω where b are nonsmooth Hörmander's vector fields of step s such that the highest order commutators are only Hölder continuous. Applying Levi's parametrix method the authors construct a local fundamental solution for $\Delta + b \cdot \nabla$ and provide growth estimates for $\Delta + b \cdot \nabla$ and its first derivatives with respect to the vector fields. Requiring the existence of one more derivative of the coefficients the authors prove that $\Delta + b \cdot \nabla$ also possesses second derivatives and they deduce the local solvability of constructing by means of a solution to $\Delta + b \cdot \nabla u = f$ with Hölder continuous f . The authors also prove estimates on this solution. Elliptic PDEs on Compact Ricci Limit Spaces and Applications

Shouhei Honda, 2018-05-29 In this paper the author studies elliptic PDEs on compact Gromov-Hausdorff limit spaces of Riemannian manifolds with lower Ricci curvature bounds. In particular the author establishes continuities of geometric quantities which include solutions of Poisson's equations, eigenvalues of Schrödinger operators, generalized Yamabe constants, and eigenvalues of the Hodge Laplacian with respect to the Gromov-Hausdorff topology. The author applies these to the study of second order differential calculus on such limit spaces. *An Age of Accountability* John L. Rury, 2023-10-13 *An Age of Accountability* highlights the role of test-based accountability as a policy framework in American education from 1970 to 2020. For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment. The theory of change embedded in almost all test-based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools. This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize. But even after very clear disappointments no other policy

framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree **Publications of the National Bureau of Standards, July 1, 1957, to June 30, 1960** United States. States Jerry McBeath,Maria Elena Reyes,Mary Ehrlander,2008-04-01 Education Reform in the American States is a timely evaluation of the accountability movement in American public education culminating in the No Child Left Behind Act federal legislation of 2002 The authors treat the current accountability movement placing it in historical context and addressing the evolution in public education policymaking from the overwhelming emphasis on state and local discretion to increasing federal oversight and mandates related to federal funding They provide case studies of the educational accountability movements in nine states and analyze the factors and forces which explain progress in achievement levels as measured on standardized tests and the states prospects for meeting their NCLB targets The book and the individual case studies acknowledge the merits of NCLB while exposing several significant flaws and unintended harmful consequences of the act particularly its incentives for states to lower their standards in order to meet annual yearly progress targets and its threat to withdraw federal funds from districts with the highest percentage of disadvantaged students The audience for this study

includes local state and federal education policy makers administrators and instructors in schools of education and other teaching programs educators and the general public
