TURNTABLE QUICK SET-UP GUIDE

These abbreviated instructions are for purchasers who have had previous experience in setting up manual turntables. If you encounter any difficulty, and especially if this is your first high-quality turntable, please study the full-length instruction manual *before proceeding*.

Numbers in square brackets identify the parts of the turntable, as shown in the illustrations in the instruction booklet.

UNPACKING

Remove the turntable system from the carton and unpack it from the styrofoam blocks. Identify the following parts: (1) the dust cover; (2) the three-part platter assembly; (3) the tonearm; (4) the small accessories bag; and (5) the main turntable assembly.

Do not discard the packing materials until after you have completed setting up the turntable and all parts are accounted for.

ASSEMBLY

Place the turntable on a level surface. Check the routing of the rubber drive belt (7), comparing it with the large expanded diagram of the turntable assembly in the instruction booklet. The belt runs from the motor pulley (8) around the rim of the sub-platter (9) and must not be twisted.

Reach under the center of the turntable and unscrew the large knurled nut on the transit screw (1), turning it all the way to the lower end of its travel.

Check to see that the rim of the metal platter disc (10) is fitted into the groove on the lower surface of the rubber mat (11), and install both on the sub-platter. Then install the center-hole adapter (12), with its flat side up. You may have to adjust the centering of the rubber mat in order to press the adapter fully down into its recess in the center of the mat, so that records will rest on the mat rather than on the adapter.

Mount the dust cover by pressing its rear lip (the section that makes a 90-degree bend) into the two spring-loaded hinges that are installed in slots at the rear of the turntable.

OPTIONAL FINGER LIFT

The finger lift provided in the accessories package may be clamped in place between the cartridge body

and the underside of the tonearm during the mounting of the cartridge.

PHONO CARTRIDGE MOUNTING

CAUTION: Before turning the tonearm over, be sure that the DVA damping rod (18) (the small screw located in the center of the tracking-force knob) is protruding at least 2 mm above the latter's surface, so as to seal the oil chamber and prevent leakage.

Use the mounting hardware supplied with the turntable, or that provided with the cartridge, to mount the pickup. Select screws with wide heads, or install flat washers beneath the screw heads, in order to provide a large bearing surface that will securely grip the tonearm surface. Tighten the screws just enough to hold the cartridge in place while still allowing its position to be adjusted.

Connect the tonearm wires to the cartridge terminals in accordance with the standard color code.

DVA ADJUSTMENTS

These adjustments set the resonance frequency (Fr) and the damping (Q) of the Dynamic Vibration Absorber (DVA). Suggested settings for many phono pickups are listed in the enclosed leaflet. If your cartridge is not listed, set the DVA frequency to 10 Hz and the Q to 2.

The frequency is set by the white screw (25) at the rear of the counterweight, protruding through a slot at the back of the tonearm. Turn the white screw until its lower end is aligned with the desired resonance frequency on the scale (26) printed on the rear of the counterweight.

The damping is set by the small threaded rod (18) in the center of the tracking-force knob (22). A small screwdriver shaft is included in the accessories bag. Screw the damping rod down into the oil chamber (19) until the lower end of the rod is aligned with the desired damping ratio (Q) on the scale printed on the front of the counterweight.

TONEARM INSTALLATION

The tonearm plugs into a socket (17) within the pivot assembly (16). Press the pivot assembly down with one hand in order to brace it securely, hold the tonearm in the other hand, align its pins with the socket, and press the tonearm fully down into the socket.

The fifth pin, midway along the length of the tonearm,
