These small effects may not generally account for the results on other tests given that the K2 test seems specific for the particular item under test. However, the present results on the K2 test in other parts of the English word list are encouraging. The following observations, based on the data with words in British and Irish English, may also be of interest to researchers in other languages. First, the results on the K2 test are similar to those obtained on other word recognition tests. This may mean that a particular skill, such as 'segmentation', is useful in English word recognition across different tests. Without more direct tests, it may be difficult to determine the nature of this skill.
