Clarke, Sharon Pittaway, 2014-04-23 Marsh's *Becoming a Teacher* 6e continues to offer pre-service teachers a practical and user-friendly guide to learning to teach that students find invaluable throughout their entire degree Marsh covers a comprehensive introduction to teaching methodology preparing pre-service teachers for the challenges they face in a 21st-century classroom All chapters in this new edition have been updated with new approaches and current references by the two new authors Maggie Clarke and Sharon Pittaway The approach in this 6th edition is more reflective and gives readers an even greater opportunity to interact with issues raised in the text *Governing by Numbers* Stephen Ball, 2018-10-11 Social science researchers have become increasingly attentive to the role of numbers in contemporary life Issues around big data national test results and output and performance statistics are now routinely reported and debated in the media Numbers are a powerful resource for governments as a means to manage and improve their populations and we are increasingly represented, organized and driven by an economy of numbers which inserts itself into more and more aspects of our lives This book critically addresses some of the ways in which numbers are deployed in educational governance and practice and some of the consequences of this deployment for what it means to be educated to teach and to learn Recognising that numbers do not simply represent but that they change things and have real effects allows us to move beyond a system where difficult and important issues about what we want from education and from teachers are side-stepped in the push to improve our numbers This collection offers a set of starting points from which we might speak back to numbers drawing on research to explore

how numbers change the way we think about ourselves and what we do This book was originally published as a special issue of the Journal of Education Policy
