Resisting Neoliberalism in Higher Education

Volume I Dorothy Bottrell, Catherine Manathunga, 2018-12-28. In light of the overwhelming presence of neoliberalism within academia, this book examines how academics resist and manage these changes. The first of two volumes, this diptych of critical academic work investigates generative spaces or cracks in neoliberal managerialism that can be exposed, negotiated, exploited, and energised with renewed collegiality, subversion, and creativity. The editors and contributors explore how academics continue to find space to work in collegial ways, defying the neoliberal logic of brands and cost centres. Part I of this diptych illuminates the lived experiences of changing academic roles, portraying institutional life without the glossy filter of marketing campaigns and brochures, and revealing generative spaces through critical testimony, fiction, arts-based projects, feminist and Indigenous critical scholarship. It will be of interest and value to anyone concerned with neoliberalism in academia, as well as higher education more generally.

Critical Perspectives on Teachers and Teaching

Jessica Holloway, 2024-02-08. This book draws attention to the new ways the field of education is problematising the emerging and evolving conditions that shape the work, lives, and identities of teachers. It offers geographically diverse accounts of the teacher and teaching, demonstrating what it means to do critical research well. Teachers and their practice have been and continue to be important sites of critical research. This book offers varied perspectives from diverse geographies to examine how teacher subjectivities are shaped by conditions of possibility. Collectively, they show how critiquing conditions, rather than the teachers themselves, provide a means for problematising the teacher, while also advocating the well-being of teachers as humans. Contributions offer compelling examples of how critical scholars can emphasise teaching as a political and value-laden exercise and therefore treat the teacher subject as also being constituted through political and value-laden discourses. Critical Perspectives on Teachers and Teaching offers a provocation to inspire new questions moving forward. That is, critical researchers have an obligation to challenge taken-for-granted assumptions, not only by looking outwards at the policymakers.

edu businesses and intergovernmental agencies e.g. OECD but also by looking inwards and challenging their assumptions about power discourse and subjectivity This book was originally published as a special issue of Critical Studies in Education
