

APA (6th edition) Referencing Style

This referencing style sheet is to be used in conjunction with the Library's general Guide to Citing & Referencing. The information is based on the following manual from the American Psychological Association (APA):

American Psychological Association. (2010). *Publication manual of the American Psychological Association* (6th ed.). Washington, DC: Author.

For help with referencing items not covered in this guide:

You might like to refer to either the *Publication manual of the American Psychological Association* (6th ed.) or the more compact version, *Concise rules of APA style* (6th ed.). Both manuals are available in the Library, on Level 3, at shelf mark 808.06615 AME. You can also access the following ebook via the Library Catalogue: [The complete guide to referencing and avoiding plagiarism](#) - this includes examples for APA and other styles.

Citation

The APA uses an author-date style of referencing with details entered in round brackets, for example:

The traditional approach to human cognition is over-simplified in assuming that processing is typically serial (Eysenck & Keane, 2010).

Treatment of multiple authors: when a work has two authors, cite both authors every time. When a work has three, four or five authors, cite all authors the first time a reference occurs. In subsequent citations, include only the surname of the first author followed by et al. See:

Kisangau, Lyanuu, Hosea, and Joseph (2007) found that ... [first time cited]

Kisangau et al. (2007) found that ... [subsequent citations]

When a work has six or more authors, cite only the surname of the first author followed by et al. and the year of publication for the first and subsequent citations.

Reference list

The reference list should contain full details of all the sources mentioned in your text, arranged alphabetically by surname of first author.

Reference examples

Below are some examples of the more common types of document you might want to reference. Each gives the APA 6th ed. format for the reference, followed by an example. **Treatment of multiple authors within reference list:** when authors number eight or more, include the first six authors' names then insert three ellipses and add the last author's name. For example:

Kisangau, A., Lyanuu, B., Hosea, C., Joseph, D., Rogers, T., Tylee, C., . . . Humphreys, L. J. (2007). *Psychology*. Birmingham: ABC Press.

Research in Communication Sciences and Disorders Lauren K. Nelson, Jaimie L. Gilbert, 2020-08-26. *Research in Communication Sciences and Disorders: Methods for Systematic Inquiry*, Fourth Edition, is a comprehensive yet comprehensible text meant for instructors and students of research methods in the field of communication sciences and disorders. This forward-thinking book reflects the movement toward evidence-based practice in speech-language pathology and audiology. The authors ensure that the concepts associated with evidence-based practice are integrated throughout the chapters. Rather than treating empirical research and searching for clinical evidence as separate topics, this text presents both as different applications of a process of scientific inquiry. The order of the chapters reflects the steps a researcher or clinician might complete when conducting an investigation. Also included are features that help students be more active in learning the material. Each chapter has a set of review questions or case scenarios that can be used as homework, as probe questions in class, or as a basis for group activities. In addition, the authors provide lists of supplemental readings from the research literature in the field. New to the Fourth Edition: New author Jaimie L. Gilbert for an enhanced audiology perspective; New chapter: Writing a Literature Review, reorganized for better flow of information; Various new and updated references to reflect the current state of research; Additional illustrations and tables; Expanded material on critical appraisal. Disclaimer: Please note that ancillary content such as documents, audio, and video, etc., may not be included as published in the original print version of this book.

A Concise Guide to Writing a Thesis or Dissertation Halyna M. Kornuta, Ron W. Germaine, 2019-04-11. *A Concise Guide to Writing a Thesis or Dissertation* provides clear, succinct, and intentional guidelines about organizing and writing a thesis or dissertation. Part I provides an overview for writing a thesis or dissertation. It describes the big picture of planning and formatting a research study from identifying a topic to focusing on writing quality. Part II describes the framework and substance of a research study. It models the pattern generally found in a formal five-chapter research study. Each chapter of a thesis or dissertation has a specific purpose, and this book focuses on each in an easy-to-follow structure. Chapter One reviews the headings and contents expected in the introduction of a study. Chapter Two provides advice for writing a literature review. Chapter Three discusses what to include when describing the methodology. These first three chapters form the proposal section of a study. Two additional chapters present results. Chapter Four and

provide discussion and conclusions Chapter Five Appendices offer resources for instructors and students including a rubric for evaluating writing exercises to strengthen skills in APA format sample purpose statements a research planning organizer and a guide for scholarly writing The book is designed overall to be a practical guide and resource for students for their thesis or dissertation process Note to readers Due to publishing limitations some of the titles within the book do not accurately conform with APA format For precise APA format please see the APA manual 2010 pp 62 63 or refer to Table 1 p 8 or Table D 1 p 107 in this book *Using Sources Effectively* Robert Alan Harris,2005 This text targets the two most prominent problems in current research paper writing the increase in unintentional plagiarism and ineffective use of research source material Designed as a supplementary textbook it will help every student who uses research in writing New to this edition More exercises and a true false quiz at the end of each chapter have been added Also new Sections on how to mark the boundaries for nontext information such as tables and drawings and using Internet sources have also been added
