

EMC Centra Content-Addressed Storage System

**Automated archiving made simple, affordable,
and secure**

Content-addressed storage (CAS) for archiving

Fixed content has many forms, such as critical business, legal, and reference documents; X-rays; e-mail attachments; check imaging; broadcast content; and satellite imagery, among many others. Unlike databases or files, which change and are updated constantly, the value of fixed content stems from the combined attributes of authenticity, long life, and accessibility. Existing storage architectures are not optimized for this new combination of requirements.

Once relegated to storage archives or file cabinets, fixed content is being driven online, fueled by regulatory requirements, digitization across virtually all industries, and the desire to leverage this content into new services and revenue streams. Just as the growth of applications such as computer-aided design (CAD) and the explosion of the Web drove the emergence of NAS to share file-based information, the need to manage and access large quantities of fixed content has given rise to a new category of networked storage—content-addressed storage (CAS).

Content-addressed storage offers a significant new approach to managing information, perfectly suited to the needs of fixed content. Content addressing eliminates the need for applications to understand and manage the physical location of information on storage media. Instead, addresses are calculated based on the content itself, and serve as a unique data check that applications can use to find and retrieve stored objects. This data check not only simplifies the task of managing huge numbers of objects, but is also in fact a digital fingerprint of the content, ensuring absolute authenticity.

EMC Centra: archiving made simple

EMC[®] Centra[®] is an IP network storage system specifically designed to store and provide fast, easy access to fixed content. It is the first solution to offer online availability with long-term retention and assured integrity for this fastest-growing category of information. Whether integrated with an in-house-developed application or an application from a continually growing group of industry-focused EMC partners, EMC Centra is the optimal information archive for businesses and organizations that require a simplified solution to expanding amounts of fixed content. EMC Centra greatly simplifies the task of managing, sharing, and protecting all sizes of content repositories. It cost-effectively puts information online in support of new sources of revenue generation, expanded business models, and increased service levels to users and customers. EMC Centra features WORM write once, read many attributes of non-repeatability and non-modifiability with disk performance and TCO (total cost of ownership) superior to current archiving approaches.

EMC Centra is the world's first CAS solution, designed from the outset to provide simple, affordable, and secure access to fixed content. EMC Centra's CentraScan[™] software operating environment employs an innovative content-addressing system to simplify management, ensure content uniqueness, and deliver the scalability needed for terabyte to petabyte-level archive requirements. And the EMC Centra system accomplishes this while dramatically lowering overall management costs.

The Big Picture

- Purpose-built magnetic-disk-based storage that overcomes the limitations of tape and optical technologies.
- Facilities governance and compliance needs for retention and preservation.
- Self-managed and self-configuration capabilities allow you to manage more content with fewer staff at lower cost.
- Future-proof architecture—Sun Microsystems technology to ensure long-term retention, assured content integrity.
- Self-healing—Redundant Array of Independent Disks (RAID) architecture, no single-points-of-failure, continuous data integrity checking, reporting, non-disruptive repair, phone-fixable capability, dual AC power sourcing.
