Rudner, 2014 A Complete Training Solution for Hazardous Materials Technicians and Incident Commanders In 1982, the authors Mike Hildebrand and Greg Noll, along with Jimmy Yvorra, first introduced the concept of the Eight Step Process for managing hazardous materials incidents. The Fourth Edition contains comprehensive content covering Hazard assessment and risk evaluation, Identifying the problem and implementing the response plan, Hazardous materials properties and effects, Identifying and coordinating resources, Decontamination procedures, The Eight Step Process, Personal protective equipment selection, Procedures for terminating the incident. The Fourth Edition's dynamic features include Knowledge and Skills Objectives correlated to the 2013 Edition of NFPA 472 Standard for Competence of Responders to Hazardous Materials, Weapons of Mass Destruction Incidents, ProBoard Assessment Methodology Matrices for the Hazardous Materials Technician and Hazardous Materials Incident Commander levels, Correlation matrix to the National Fire Academy's Fire and Emergency Services Higher Education (FESHE) Bachelor's Non-Core Managerial Issues in Hazardous Materials Course Objectives, Realistic detailed case studies, Practical step-by-step skill drills, Important hazardous materials technician and safety tips
