disorders and leader derailment It highlights an area that has not been widely studied by leadership researchers to date the dynamic relationship between the psychological and spiritual domains in shaping the dark side which lead to leadership failure and derailment This book calls for a more interdisciplinary approach and holistic understanding of the dark side of leadership inseparably relating body soul and spirit as they function individually and relationally It highlights the fact that the restoration of personality will require sustained dialogue between theologians and the medical and psychological professions Such a theoretical perspective would help us better understand how personality disorders develop not only emotionally and psychologically but spiritually
