*EBOOK: Financial Accounting Theory: European Edition* DEEGAN, CRAIG, 2011-01-16 The second edition of Craig Deegan and Jeffrey Unerman's market leading text presents the various theories of financial accounting through a balanced and dynamic approach. **EBOOK: Financial Markets and Corporate Strategy: European Edition** David Hillier, Mark Grinblatt, Sheridan Titman, 2011-01-16 The second European edition of *Financial Markets and Corporate Strategy* provides comprehensive coverage of financial markets and corporate finance brought to life by real world examples, cases and insights. Placed in a truly international context, this new and updated edition takes an academic and practical viewpoint to guide students through the challenges of studying and practicing finance. Aimed specifically at an international audience, this edition boasts hundreds of references to new and relevant non-US research papers from top finance journals. Whilst retaining the well-respected structure of the successful US text, Professor David Hillier has also made a number of additions which include fully updated research data and examples in every chapter. Coverage of the global financial crisis, the impact it made on the financial markets and the lessons being learnt by the finance industry. A stronger emphasis on corporate governance and agency theory. Updates on accounting standards, bankruptcy laws, tax rules and tax systems.

**Teaching IFRS** Richard M.S. Wilson, Ralph Adler, 2013-09-13 The increasing pace of global conformance towards the adoption of International Financial Reporting Standards (IFRS) highlights the need for accounting students as well as accounting practitioners to be conversant with IFRS. *Teaching IFRS* offers expert descriptions of and insights into the IFRS convergence process from a teaching and learning perspective. Hence, this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world. The contents of the book come from authoritative sources and offer something distinctive to complement the existing textbooks which typically focus on the technical aspects of IFRS and their adoption. Drawing upon the experiences of those who have sought to introduce IFRS-related classroom innovations and the associated student outcomes achieved therefrom, the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS-related teaching resources to support those courses. This book was originally published as a special issue of *Accounting Education*, an international journal.
