Financial Intelligence Report 20:

Financial Investigation and Financial Intelligence Craig Hughes, David Hicks, 2024-12-31 This book critically analyses the conceptual understanding of financial investigation and financial intelligence among UK law enforcement authorities and their commentators. The work provides a critical review of financial investigation including international standards and how it is perceived and applied by law enforcement agencies. It adopts the position that financial investigation is an evidence gathering process and not simply related to asset recovery. Here the concept of following the money is superseded by the wider approach of following the financial footprint by generalist and specialist investigators and analysts. The book focuses on identifying the financial footprint as a skill set for routine investigation application inclusive of the emerging threat posed by the digital environment including cryptocurrencies. It assesses the terminology, typologies and structures associated with the subject area at the national and international levels. It also examines the historical trajectory of financial investigation to understand current perceptions of it within law enforcement among government ministers and policy makers. The book will be of interest to students, academics and policy makers internationally working in the areas of criminal law, criminology and finance.

Anti-Money Laundering and the Law Engin Erken, Umut Turksen, 2024-08-27 This book provides a distinctive and critical analysis of the anti-money laundering (AML) measures that have been put in place in Turkey and the United Kingdom. The work presents a comparative analysis of if and to what extent the AML regimes in these jurisdictions are fit for purpose in countering some of the most pressing predicate crimes. It investigates the AML regimes relating to tackling the riskiest most prevalent predicate crimes that is drug trafficking and tax crimes, thereby filling a significant gap within the current literature. The study provides insights into the effectiveness and efficiency of national AML frameworks adopted by Turkey and the UK in addressing distinct crimes, thereby identifying essential features of an optimum AML ecosystem that could effectively address predicate crimes regardless of their nature. This novel approach offers a detailed analysis of the law in books and law in practice elements of the AML regimes in Turkey and the United Kingdom, which will set the tone for conducting similar studies in other jurisdictions. The book will be of interest to academics, researchers and policy makers working in the areas of Financial Crime, Law Enforcement and Comparative Law.

Financial Intelligence Units International Monetary Fund, 2004-06-17 Over the past decade and beyond the need for a modern anti-money laundering strategy has become widely accepted internationally. Depriving criminal elements of the proceeds of their crimes has increasingly been seen as an important tool to combat drug trafficking and more recently as a critical element in fighting organized crime, corruption and the financing of terrorism and maintaining the integrity of financial markets. The first few financial intelligence units (FIUs) were established in the early 1990s in response to the need for countries to have a central agency to receive, analyze and disseminate financial information to combat money laundering. Over the ensuing period

the number of FIUs has continued to increase reaching 84 in 2003 This handbook responds to the need for information on FIUs It provides references to the appropriate Financial Action Task Force FATF standards wherever appropriate
