

Using the dehumidifier.

Always make sure the water bucket is locked into place on the dehumidifier.

Removing Collected Water

There are 2 ways to remove collected water:

- 1 **Use the bucket.** When the bucket is removed, the unit will shut off. Empty and replace the bucket.

NOTE: Support bucket with both hands when emptying.

IMPORTANT: Do not use the hose if using the bucket to collect water. When the hose is connected, water will flow through it onto the floor instead of into the bucket.

NOTES:

- Do not remove the bucket while the dehumidifier is operating or if it has just stopped operating. This might cause some water to drip from the drain pan.
- The bucket must be in place and securely seated for the dehumidifier to operate.

- 2 **Use a hose.** Water can be automatically emptied into a floor drain by attaching a garden water hose (not included).

1. Remove the bucket from the front of the unit.
2. Open the drain cover on the side of the unit.
3. Thread a garden hose (not supplied) onto the nozzle, cut to length, and lead it to the floor drain.
4. Replace the bucket in the unit.

NOTE: The bucket must be in place and securely seated for the dehumidifier to operate.

- 3 **Use the internal pump.** Water can be automatically emptied into a remote location by attaching the included pump hose.

1. Attach the pump hose to the hose connector by pushing the tube fitting into the connector until it fits into place (should not be able to remove the hose when pulled).
2. Position the hose discharge to the desired location.
3. Make sure the pump is activated. To activate the pump, press and hold the Pump On/Off button for 3 seconds. The Internal Pump On indicator light will flash then remain illuminated once the 3 seconds are complete.

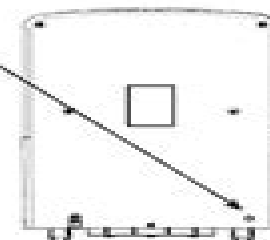

IMPORTANT: Make sure the condensate hose is properly connected and is not kinked, bent or cracked as this may cause water to flow onto the floor. The bucket must also be fully seated for the pump to work properly. Do not operate the machine if the room temperature is 32°F or below.

NOTES:

- Maximum lift height is 16ft
- The bucket must be in place and securely seated for the dehumidifier and pump to operate.

Make sure to install hose (included) before activating the pump.

Install hose at connector on backside of machine.

To install Hose: Push in hose and gently pull to make sure it is secure.

Push hose in

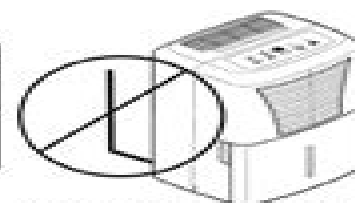

To Release Hose: Hold the grey ring while pulling to remove

2. Pull hose out

CORRECT

DO NOT kink or crimp hose, as it can block water flow.
