The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school, a social incubator in a largely segregated city that was highly even improbably successful throughout its 156-year existence. Established in 1855 as Central High School and reorganized in 1916, Schenley High School was a model of innovative public education and an ongoing experiment in diversity. Its graduates include Andy Warhol, actor Bill Nunn, and jazz virtuoso Earl Hines, and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of investment as well as destructive neglect, the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt. Integrated decades before *Brown v. Board of Education*, Schenley succumbed to default segregation during the white flight of the 1970s; it rose again to prominence in the late 1980s when parents camped out in six-day-long lines to enroll their children in visionary superintendent Richard C. Wallace's reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008, citing over \$50 million in necessary renovations, a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents, and hundreds of first-person accounts drawn from a community indelibly tied to the school. A memorable, important work of local and educational history, his book is a case study of desegregation, magnet education, and the changing nature and legacies of America's oldest public schools.

Male Suicide and Masculinity in 19th-century Britain Lyndsay Galpin,2022-04-07 This book shows how interpretations of suicidal motives were guided by gendered expectations of behaviour and that these expectations were constructed to create meaning and understanding for family friends and witnesses Providing an insight into how people of this era understood suicidal behaviour and motives it challenges the assertion that suicide was seen as a distinctly feminine act and that men who took their own lives were feminized as a result Instead it shows that masculinity was understood in a more nuanced way than gender binaries allow and that a man s masculinity was measured against other men Focusing on four common narrative types the love suicide the unemployed suicide the suicide of the fraudster or speculator and the suicide of the dishonoured soldier it provides historical context to modern discussions about the crisis of masculinity and rising male suicide rates It reveals that narratives around male suicides are not so different today as they were then and that our modern model of masculinity can be traced back to the 19th century
