LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

1. In this introductory module video, you were asked to name eight islands with cactagators. Which cactagator did you think felt like the most "out of place"?

My answer was: cactagators living in the desert area.

2. Did you notice your cactagator wasn't happy?

When I saw the cactagator, I thought about how many times I had seen cactagators before, but I didn't know how to get them to live in the desert area.

3. An adaptation is a structure or function that is inherited by a population because it increases the ability to survive and reproduce in a particular environment. Provide one example and an explanation of an adaptation in the desert lizard.

The example of the desert lizard is its ability to live in the desert. This is because the desert is a harsh environment and the lizard has adapted to live there.

4. Provide one evolutionary explanation for why cactagators in the desert aren't eating cactagators (i.e., the grass) would have survived a cactagator.

One evolutionary explanation for why cactagators in the desert aren't eating cactagators is that cactagators in the desert are adapted to live in the desert and eat cactagators.
