Using Social Science to Understand and Improve Wildland Fire Organizations Gregory Larson, 2007

The wildland fire community has spent the past decade trying to understand and account for the role of human factors in wildland fire organizations. Social research that is relevant to managing fire organizations can be found in disciplines such as social psychology, management and communication. However, such research has been published primarily for scientific and business audiences and much of the fire community has not been exposed to it. Here we have compiled and organized knowledge from a variety of social science disciplines so that it can be used to improve organizational practices related to firefighter and public safety, to assess the effectiveness of safety campaigns and to improve firefighter safety trainings. This annotated reading list summarizes approximately 270 books, articles and online resources that address scientific and management concepts helpful for understanding the human side of fire management. The first section, Human Factors and Firefighting, introduces readers to key workshops and writings that led to the recognition that human factors are prime ingredients of firefighter safety. The second section, Foundations for Understanding Organizations, consists of social science research that provides a foundation for understanding organizational dynamics. This section includes readings on decision making and sensemaking, organizational culture, identification and identity, leadership and change, organizational learning and teams and crews. The third section, Understanding Organizations in High Risk Contexts, explores organizations that deal regularly with risk, uncertainty and crisis. This section includes readings on risk and uncertainty, high reliability organizing

and crisis communication The publication concludes with Internet resources available for those interested in the management of fire organizations *Directives, Publications and Reports Index* United States. Coast Guard, *Guide to U.S. Government Publications* ,2008-08 This comprehensive yet concise annual annotated reference source catalogs the important series periodicals and reference tools published by U S government agencies Over the years the index section of the Guide to U S Government Publications has expanded to more than 40 000 entries Agencies and titles are indexed followed by a keyword title index for quick and easy referencing No other single resource provides historical and current information on U S government publications in one place **Department of Defense Appropriations for Fiscal Year 2008** United States.
