

CHAPTER 11

COST ESTIMATION

1. Questions

1.
 - a. **Variable cost:** A variable cost is one that remains constant on a per unit basis, but which changes *in total* in direct relationship to changes in volume.
 - b. **Fixed cost:** A fixed cost is one that remains constant in total amount, but which changes, if expressed on a per unit basis, inversely with changes in volume.
 - c. **Mixed cost:** A mixed cost is a cost that contains both variable and fixed cost elements.
2.
 - a. Unit fixed costs will decrease as volume increases.
 - b. Unit variable costs will remain constant as volume increases.
 - c. Total fixed costs will remain constant as volume increases.
 - d. Total variable costs will increase as volume increases.
3.
 - a. **Cost behavior:** Cost behavior can be defined as the way in which costs change or respond to changes in some underlying activity, such as sales volume, production volume, or orders processed.
 - b. **Relevant range:** The relevant range can be defined as that range of activity within which assumptions relative to variable and fixed cost behavior are valid.
4. Although the accountant recognizes that many costs are not linear in relationship to volume at some points, he concentrates on their behavior within narrow bands of activity known as the relevant range. The relevant range can be defined as that range of activity within which assumptions as relative to variable and fixed cost behavior are valid. Generally, within this range an assumption of strict linearity can be used with insignificant loss of accuracy.
5. The high-low method, the scattergraph method, and the least-squares regression method are used to analyze mixed costs. The least-squares regression method is generally considered to be most accurate, since it derives the fixed and variable elements of a mixed cost by means of
